Superior performance over competing Wireless N routers

Intelligent QoS prioritization technology

Gigabit ports for incredible wired network speeds

**BEST-IN-CLASS FEATURES**

The D-Link® Xtreme N® Gigabit Router (DIR-655) is a Wireless N compliant device that delivers up to 14x faster speeds1 and 6x farther range1 than previous-generation Wireless G devices. Connect the Xtreme N Gigabit Router to a cable or DSL modem and provide high-speed Internet access to multiple computers, game consoles, and media players. Create a secure wireless network to share photos, files, music, videos, printers, and network storage. Powered by Xtreme N technology and equipped with three external antennas, this router provides superior wireless coverage for larger homes and offices, or for users running bandwidth-intensive applications. The DIR-655 also includes a 4-port 10/100/1000 Gigabit switch that connects Gigabit wired devices for enjoying lag-free network gaming and faster file transfers.

**SHAREPORT™**

D-Link has created SharePort™ technology to bring more flexibility to your network. With SharePort technology, you can connect a USB printer and share it throughout your network. You can also share a USB storage device, providing network storage for everyone to share.

**WHY INTELLIGENT QoS IS BETTER**

With some routers, all wired and wireless traffic, including VoIP, Video Streaming, Online Gaming, and Web browsing are mixed together into a single data stream. By handling data this way, applications like video streaming could pause or delay. With the D-Link Intelligent QoS Technology, wired and wireless traffic are analyzed and separated into multiple data streams.

**ADVANCED NETWORK SECURITY**

The Xtreme N Gigabit Router supports the latest wireless security features to help prevent unauthorized access, be it from over a wireless network or the Internet. Support for WPA™ and WPA2™ standards ensure that you will be able to use the best possible encryption regardless of your client devices. In addition, this Xtreme N router utilizes Dual Active Firewalls (SPI and NAT) to prevent potential attacks from across the Internet for the ideal centerpiece for your wireless network in the home or office.

GIGABIT ROUTER
WHAT THIS PRODUCT DOES
Create a wireless network to share high-speed Internet access with computers, game consoles, or media players from greater distances in your home or office.

XTREME N™ ROUTER BENEFITS
+ Intelligent QoS Technology
+ Xtreme N technology allows for farther home coverage1
+ Secure your wireless network using advanced WPA™ or WPA2™ encryption
+ Easy to get started with the D-Link Quick Router Setup Wizard
+ Compatible with previous-generation Wireless G devices including game consoles and digital media players

THINK GREEN
D-Link Green™ devices are about providing eco-friendly alternatives without compromising performance. They are designed to help conserve energy, protect our environment from harmful substances, and reduce waste by using recyclable packaging.

CONSERVES ENERGY
+ Automatically powers down ports that have no link
+ Budgets power output for different Ethernet cable lengths
+ Includes wireless LAN scheduling, which can shut down your wireless network when not in use for further power savings
+ Reduces energy consumption by using an Energy Star® qualified power adapter

PROTECTING THE ENVIRONMENT
+ Complies with the European Union’s RoHS directive that restricts the use of certain hazardous materials
+ Uses recyclable packaging to help reduce waste that goes into the environment
