

Product Highlights

Great Speed and Coverage

802.11n wireless provides excellent wireless speeds and the two external antennas increase wireless range to reach every corner of your home

Simple Setup

Get up and running in no time with the intuitive web-based setup wizard that walks you through the configuration process

Keeps Your Network Secure

Keep your network safe with WPA/WPA2 wireless encryption and active firewall to protect your network from local and remote intrusions

DIR-615

Wireless N 300 Home Router

Features

Connectivity

- 10/100 fast Ethernet Internet port for connection to broadband Internet
- Four 10/100 fast Ethernet LAN ports for connection to wired devices
- Latest Wireless N technology for increased speed and range

Security

- Active firewall to control traffic and prevent both local and remote intrusions
- Wi-Fi Protected Setup (WPS) to quickly and securely add devices to your network
- WPA/WPA2 encryption secures your wireless traffic

Ease of Use

- Web browser-based setup and configuration
- Setup wizard to guide you through the configuration process

The DIR-615 Wireless N 300 Home Router is a versatile, high-performance router that features Wireless N and fast Ethernet ports, making it easy for you to share your broadband Internet connection with a range of devices. Simply connect it to your broadband modem, then start the web-based setup wizard which guides you step-by-step through the configuration process. Whether you're surfing the web on your desktop or relaxing on the couch with your laptop, the DIR-615 keeps you connected wherever you are in your home.

A Fast and Reliable Home Network

The D-Link DIR-615 Wireless N 300 Home Router helps you to create a high-speed home network that can connect all of your computers and mobile devices to your broadband Internet connection. 802.11n technology provides wireless speeds up to 300 Mbps¹ for fast file transfers, high-quality streaming video, and smooth online gaming. The dual 5 dBi external antennas increase the wireless coverage range so you can avoid "dead spots" and get a reliable connection in more places throughout your home.

Flexible Connectivity for Your Devices

The DIR-615 keeps you connected, no matter whether you're using a desktop or laptop PC, a smartphone, or a tablet. Four 10/100 Fast Ethernet ports provide fast and reliable connectivity for your wired devices, while Wireless N 300 lets you connect all of your wireless devices across your home. Get some work done on your desktop, play online with your game console, or check out online videos on your smartphone - the Wireless N 300 Home Router lets you access the Internet no matter which device you are using.

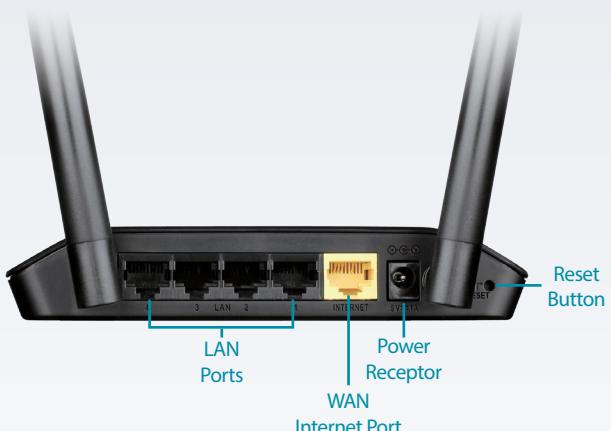

Easy to Set Up, Easy to Secure

Sharing your Internet connection doesn't have to be a complicated process - just open a web browser to access the setup wizard and follow the easy step-by-step instructions to get started. Create a secure network in seconds using Wi-Fi Protected Setup, which instantly creates a secure connection to a new device without the need to enter settings or create passwords.

Security Features Keep Your Network Safe

The DIR-615 has a host of security features, meaning you can access the Internet without fear of your network being compromised. WPA/WPA2 encryption secures wireless traffic across your network, preventing unauthorized access and eavesdropping, and the NAT firewall protects your network from attacks and intrusions via the Internet. No matter whether you are shopping online, doing your banking, or accessing your personal email, the DIR-615 keeps your data and your network safe.

DIR-615 Wireless N 300 Home Router

Order Information

Part Number	Description
DIR-615	Wireless N 300 Home Router

¹ Maximum wireless signal rate derived from IEEE Standard 802.11n, 802.11g, and 802.11b specifications. Actual data throughput will vary. Network conditions and environmental factors, including volume of network traffic, building materials and construction, and network overhead, lower actual data throughput rate. Environmental factors will adversely affect wireless signal range. Wireless range and speed rates are D-Link relative performance measurements based on the wireless range and speed rates of a standard Wireless G product from D-Link. Maximum throughput based on D-Link 802.11n devices.
