KVMSwitch
2, 4 Ports

Stand-alone
For SOHO/Workgroups

These Keyboard, Video, and Mouse (KVM) switches allow you to take control of 2 or 4 different server PCs using just one keyboard, monitor, and mouse. They're easy to use and powerful.

Each KVM switch utilizes an advanced microprocessor emulation to intelligently manage each KVM port. This allows simultaneous boot-up of all the attached PCs. Auto-scan, audible feedback and keyboard "Hot Key" make this device simple to use and manage. There is also a control button located on the front panel that allow you to change control of each PC.

The KVM switch's intelligent microprocessors save CAPSLOCK, NUM LOCK, and SCROLL LOCK status for each PC. It supports VGA, SVGA, and MultiSync monitors at up to 1600 x 1200 resolution.

The device supports PS/2 keyboards and AT serial mice using an AT to PS/2 adapter (not included). Support for Microsoft IntelliMouse is also provided.

Benefits

- Control 2 or 4 PCs from a single keyboard, monitor, mouse
- Save hundreds or thousands of dollars in equipment, space and power cost
- Compatible with virtually all operating systems and PCs
- Sturdy housing and quality connectors for long life
- Simple cable sets available to connect to keyboard, monitor, mouse
- 2-port KVM switch has pocket-sized design
- 4-port KVM switch has palm-sized design
