

D-Link Quick Installation Guide

DES-1008F

10/100M Fast Ethernet Switch

Before Your Begin

This Quick Installation Guide gives step-by-step instructions for setting up the D-Link DES-1008F 10/100M Fast Ethernet Switch. The model you have purchased may appear slightly different from those shown in the illustrations.

Check Your Package Contents

These are the items included with your DES-1008F purchase:

- **DES-1008F 10/100M Fast Ethernet Switch**

- **Quick Installation Guide**

- **Power Adapter**

Using a power supply with a different voltage rating will damage and void the warranty for this product.

If any of the above items are missing, please contact your reseller.

1

Setup The DES-1008F 10/100M Fast Ethernet Switch

The setup of the Switch can be performed using the following steps:

- A. Install the DES-1008F in a fairly cool and dry place. See Technical Specification for the acceptable operation temperature and humidity ranges.
- B. Install the Switch in a site free from strong electromagnetic source, vibration, dust, and direct sunlight.
- C. Leave at least 10cm of space at the left and right hand side of the Switch for ventilation.
- D. Visually inspect the DC power jack and make sure that it is fully secured to the power adapter.

Do not stack any device on the Switch.

2

Mounting the Switch on a Wall

The DES-1008F can also be mounted on a wall. Two mounting slots are provided on the bottom of the switch for this purpose. Please make sure that the front panel is exposed in order to view the LEDs. Please refer to the illustration below:

- A. Mounting on a cement wall
 1. Mount the Nylon screw anchors into a cement wall.
 2. Drive the T3 x 15L screws into the Nylon screw anchors.
 3. Hook the mounting holes of the switch back on the screws; you have completed the wall-mount.
- B. Mounting on a wood wall
 1. Drive the T3 x 15 L screws into the wood wall.
 2. Hook the mounting holes of the switch back on the screws; you have completed the wall-mount.

(1) 3/4 inch minimum
for wood wall

(2) 3 inch minimum
for cement wall.

3

Connecting The DES-1008F To Your Network

DES-1008F

DC Power Jack: Power is supplied through an external AC power adapter. Since the switch does not include a power switch, plugging its power adapter into a power outlet will immediately power it on.

Auto-MDI-X Function ports: Use these jacks (port1 ~ port-7) for DES-1008F to connect stations to the hub. An Auto-MDI-X function will automatically detect if a crossover is required and make the swap of TX pair and Rx pair internally. With this function, straight-through cable can be used for any connection. MDI to MDI-X connection rule is not necessary anymore. In the switches, all TX ports are equipped with this function. You can use just straight-through type cables for all your connections.

100BASE-FX Fiber Port: The DES-1008F Fiber port supports a 100BASE-FX Duplex SC connector for a 1310 nm Multi-mode fiber link of up to 2 km.

Duplex Mode Switch: The switch is to select the operation mode either to run in full or half duplex mode for 100BASE-FX. When turning the switch to FDX, the fiber port will run at full duplex or turn to HDX, the fiber will run at half duplex.

4

LED Indicators

Power

This LED indicator lights green when the switch is receiving power, otherwise, it is off.

FDX/Col (Full-Duplex/Collision)

This LED indicator lights green when a respective port is in full duplex (FDX) mode. Otherwise, it is blinking when collisions are occurring on the respective port.

100M LINK/ACT(*green*), 10M LINK/ACT(*amber*)

This LED indicator lights green when the port is connected to a 100Mbps Fast Ethernet station, if the indicator blinking green will be transmission or received data on the 100Mbps network. Otherwise, if the indicator lights amber when the port is connected to a 10Mbps Ethernet station, if the indicator blinking amber will be transmission or received data on the 10Mbps network.

Technical Support
