Agenda

› D-Link Storage Solution Features.

- Features & Software Applications.
- NAS New Features Update.

› D-Link Storage Portfolio.

- NAS
 - DNS-315, DNS-320, DNS-320L, DNS-325, DNS-345
- IP SAN
 - DNS-3200, DNS-3400
- NAS-IP SAN
 - DNS-1100-04, DNS-1200-05, DNS-1550-04
- NVR
 - DNR-322L, DNR-326

Features & Software Applications

Intuitive User Interface

Simplified Management – no special IT skills needed

The screenshot displays the ShareCenter Pro™ by D-Link user interface. The main window is titled "ShareCenter Pro™ by D-Link" and shows a "Disk Management" section. A red circle highlights the "Disk Management" menu item in the left sidebar. Another red circle highlights the "Disk Diagnostic" icon in the main area. A third red circle highlights the "iSCSI Target" icon in the main area. A "Create iSCSI Target" dialog box is open, showing "iSCSI Target Settings". The dialog includes fields for "Pre-allocate:" (No/Yes), "Name:" (iqn.2010-01.com.d-link:dlink-570412), "Volume:" (Volume_1), and "Size:" (GB (191.05 MB / 274.08 GB)). Buttons for "Previous", "Next", and "Cancel" are at the bottom.

Below the main window, a table displays disk diagnostic results:

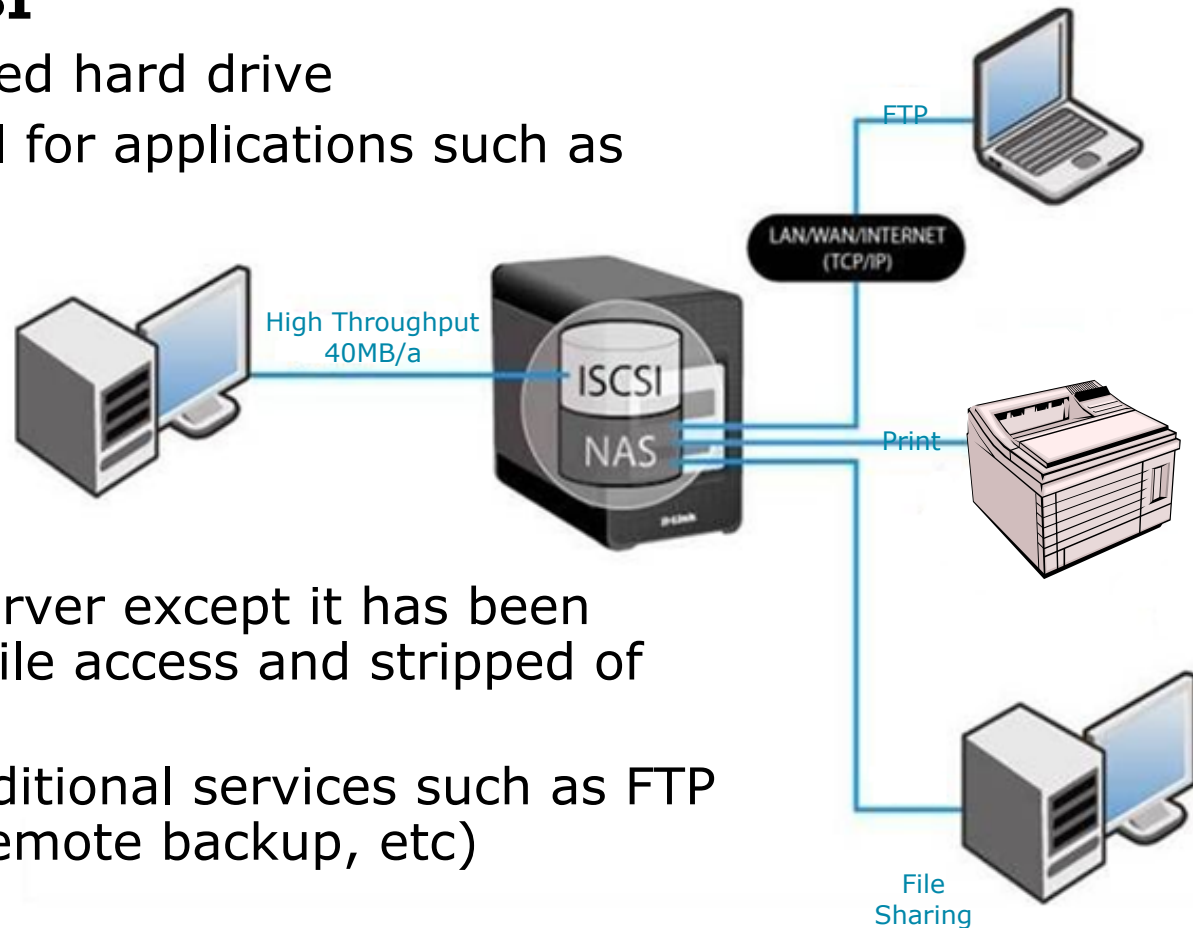

| Slot | Manufacturer | Model | Schedule | Progress | Result |
|------|-----------------|----------------------|----------|----------|--------|
| 1 | Western Digital | WDC WD6402AAEX... | None | - | Pass |
| 2 | Hitachi | Hitachi HDP725050... | None | - | - |
| 3 | Western Digital | WDC WD3000HLFS... | None | - | Pass |
| 4 | Western Digital | WDC WD5000AVJS-... | None | - | Pass |
| 5 | - | - | - | - | - |

What is Unified Storage?

Unified Storage: Concurrent iSCSI and NAS

Characteristics of iSCSI

- Acts as a locally attached hard drive
- Block-level access ideal for applications such as email and databases

Characteristics of NAS

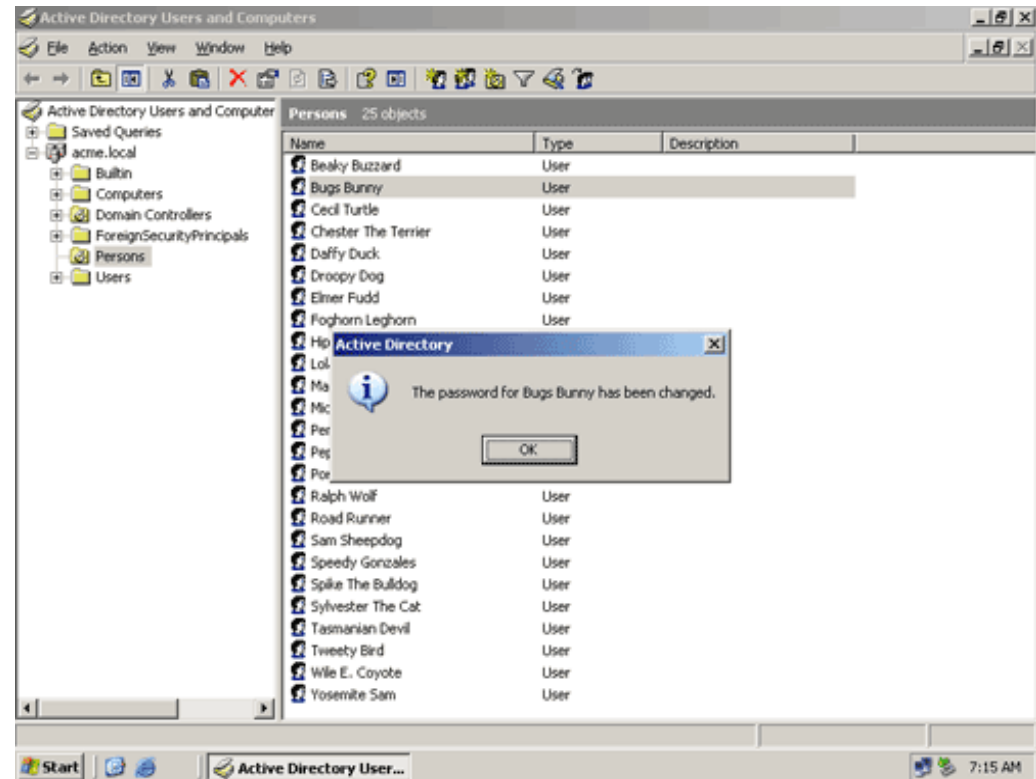

- Like a traditional file server except it has been optimized for efficient file access and stripped of auxiliary utilities.
- D-Link incorporates additional services such as FTP Server , Print server, remote backup, etc)

Microsoft Active Directory Support

Active Directory Service (ADS)

Microsoft Active Directory is a database service that allows for a single point of administration for all shared resources on a network, including

- Files
- Peripheral devices
- Databases
- Web sites
- Users, and services.

D-Links ShareCenter™ Pro 1100 and 1200 can easily integrate into any Active Directory environment.

Microsoft Active Directory Support

Active Directory Support

Active directory support will import the user database to the Storage Unit.

This permit to network manager to define access policies on the storage unit with the existent users on the Domain controler user database, without needing to create local users.

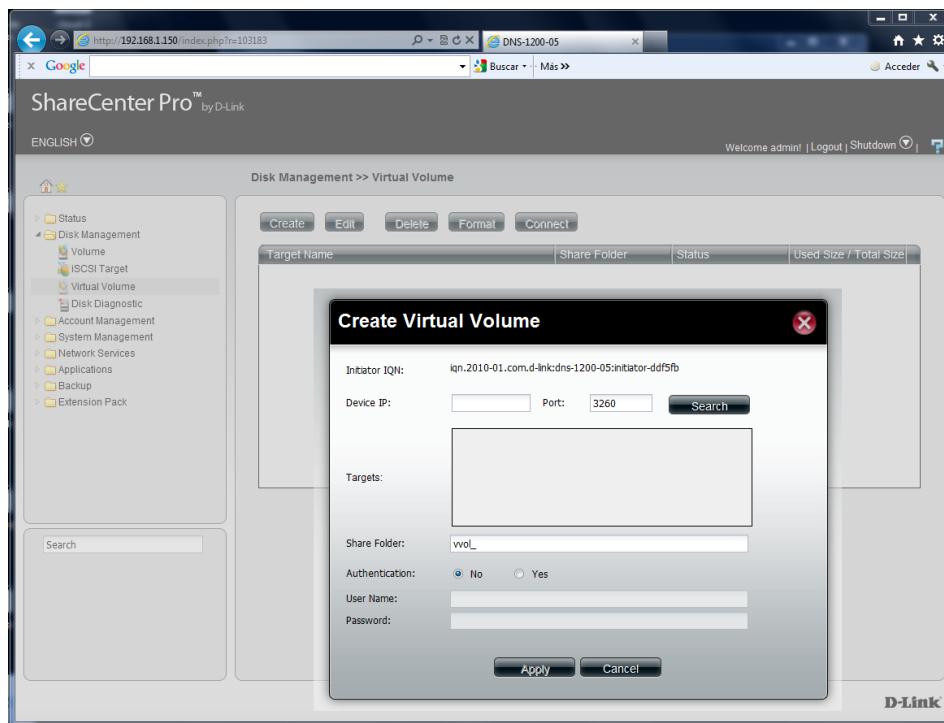

The screenshot displays the ShareCenter Pro web interface by D-Link. The browser address bar shows the URL `http://192.168.1.150/index.php?r=108677`. The interface includes a navigation menu on the left with options like Status, Disk Management, Account Management, System Management, Network Services, File Sharing, Dynamic DNS, SNMP, and Network Discovery Services. The main content area is titled "Network Services >> File Sharing" and contains tabs for File Sharing, FTP, CIFS, and DFS. The "CIFS" tab is selected, showing a "Description" section with the text "ShareCenter Pro 1200" and a "Workgroup Type" section with radio buttons for "Workgroup" and "Active Directory". The "Active Directory" option is selected, and the form fields are populated with the following values: User Name: Administrator, Password: (masked with dots), DNS: 192.168.1.1, Workgroup: DLINKES, Realm Name: DLINK.ES, and AD Server Name: RASCA. At the bottom of the form are "Apply" and "Cancel" buttons. The D-Link logo is visible in the bottom right corner.

Virtual Disk Expansion

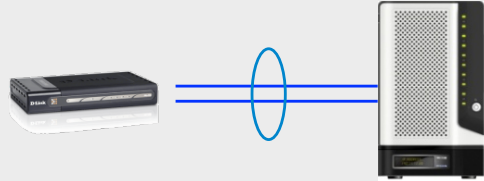

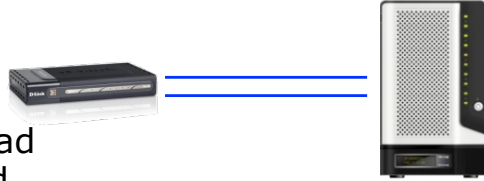

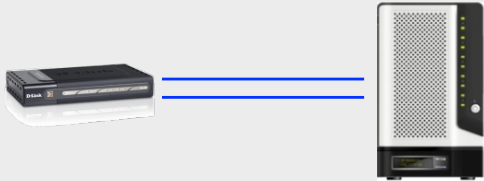

- Using iSCSI the DNS-1100-04 and DNS-1200-05 can connect to other iSCSI targets on the network and present them as virtual disks
- These virtual disks are seen as multiple single volumes and can be accessed by servers and workstation on the network

Benefit:

Virtual Disk Expansion enables users to add storage capacity to the DNS-1200-05 or DNS-1100-04 beyond the drives installed

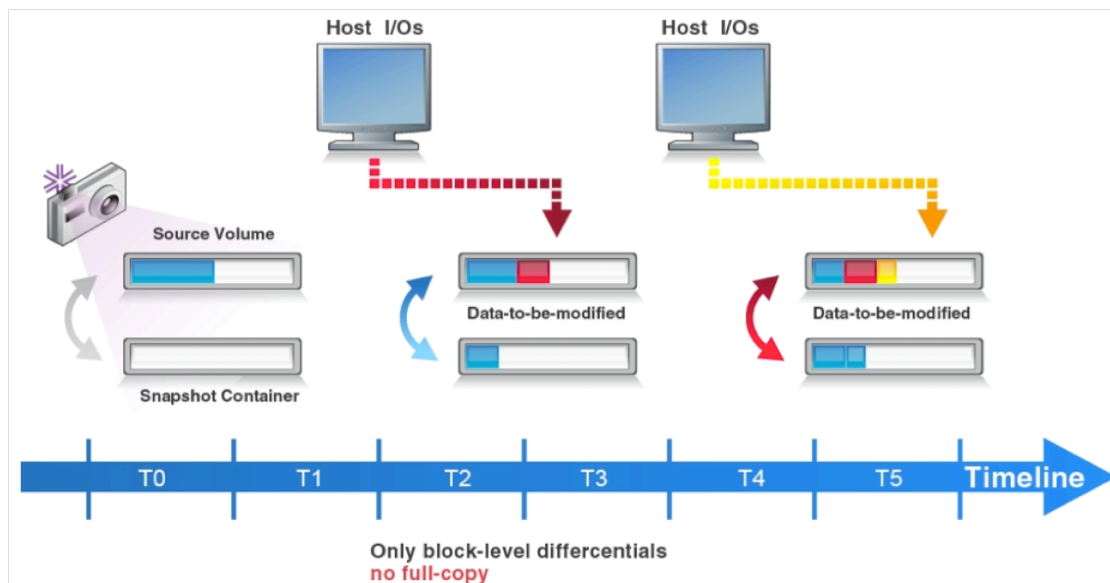

Dual Gigabit Ethernet Benefits

| Features | Description | Benefits | Figure |
|------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|
| Link Aggregation | Link Aggregation combines both LAN ports into a single group in to increase the link speed beyond that of a single cable or port. | <ol style="list-style-type: none">1. Performance enhancement2. Throughput enhancement |  |
| Load Balancing | Load balancing is a way to spread data traffic (workload) between each port, in order to achieve optimal resource utilization, maximize throughput, and minimize response time. | <ol style="list-style-type: none">1. Network connectivity optimization: Using 1 cable the workload is 100% Using 2 cables with load balancing the workload per cable is only 50% |  |
| Failover | Failover automatically switches the data traffic from a failed port to working port. Should the port come back then the information will be retransmitted. | <ol style="list-style-type: none">1. Improved Network reliability2. Reduced downtime |  |

Snapshot Technology

D-Links ShareCenter™ Pro 1100, 1200, 1550 include Volume Snapshot capabilities to record multiple points in time for the data, so that should an emergency occur, the data can be rolled back to the earlier state without having to restore from backups

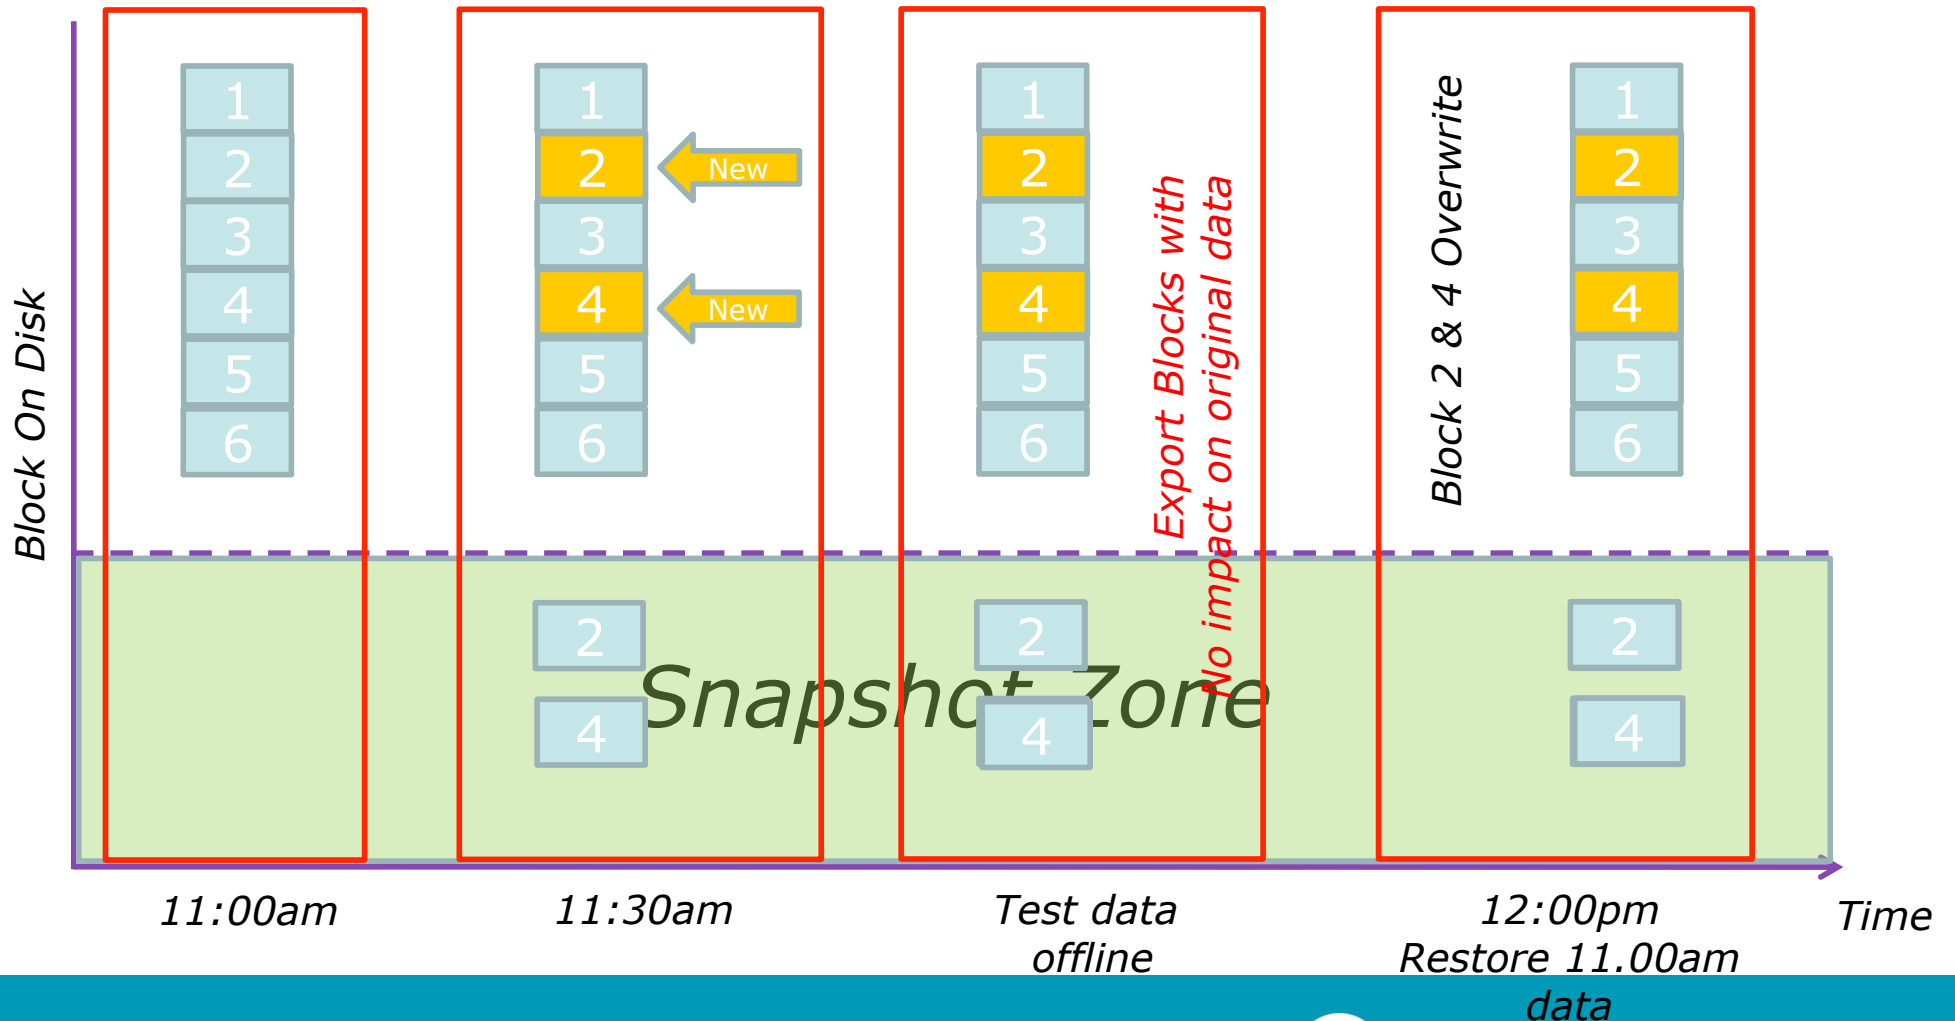

› Benefits:

1. Snapshots shorten the time of data backup
2. Snapshots allow users to instantly restore the data to a designated time
3. Snapshots provide easy backup management

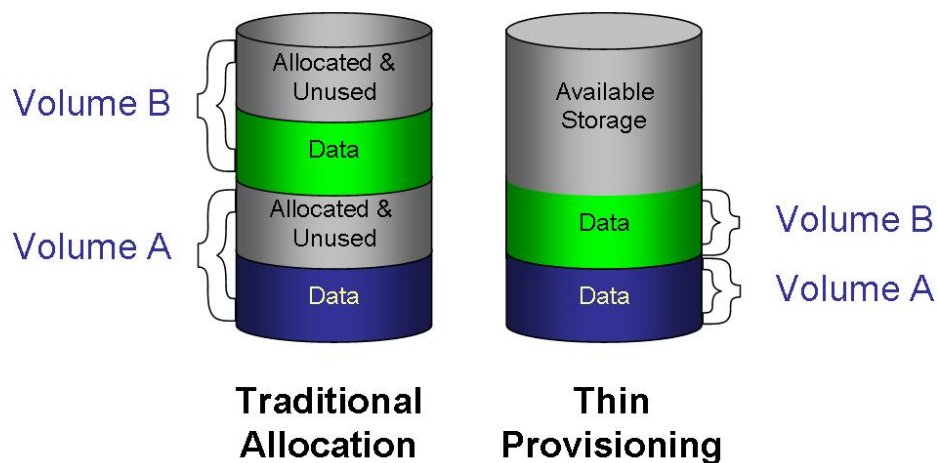

Snapshot Technology

› COW (Copy-On-Write) Snapshot Technology

Thin Provisioning

- › Thin Provisioning is a method of optimising the utilisation of available storage
- › Thin provisioning allows disk capacity to be allocated to servers on a “just enough” and “just in time” basis.
- › Organisations or departments can now be charged for actual capacity usage, reducing operating costs and improving resource management.

› Benefits

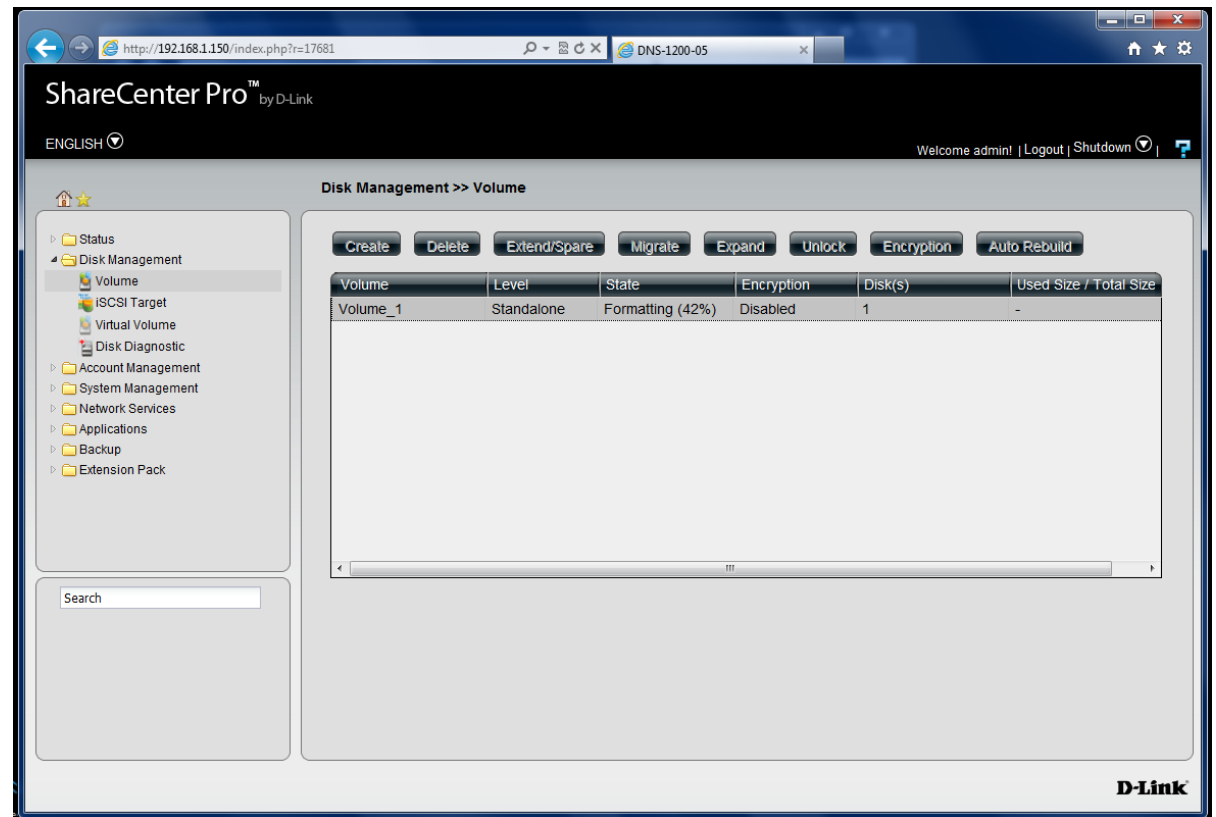

1. Lower initial purchase cost
2. Upgrade capacity in line with actual business usage
3. Enhanced storage capacity utilization
4. Reduce operation cost

Thin Provisioning

Create a Volume

Once a RAID is created and formatted, a Volume will be created. This Volume can be used for different purposes.

- File Share as NAS
- LUNs in iSCSI mode

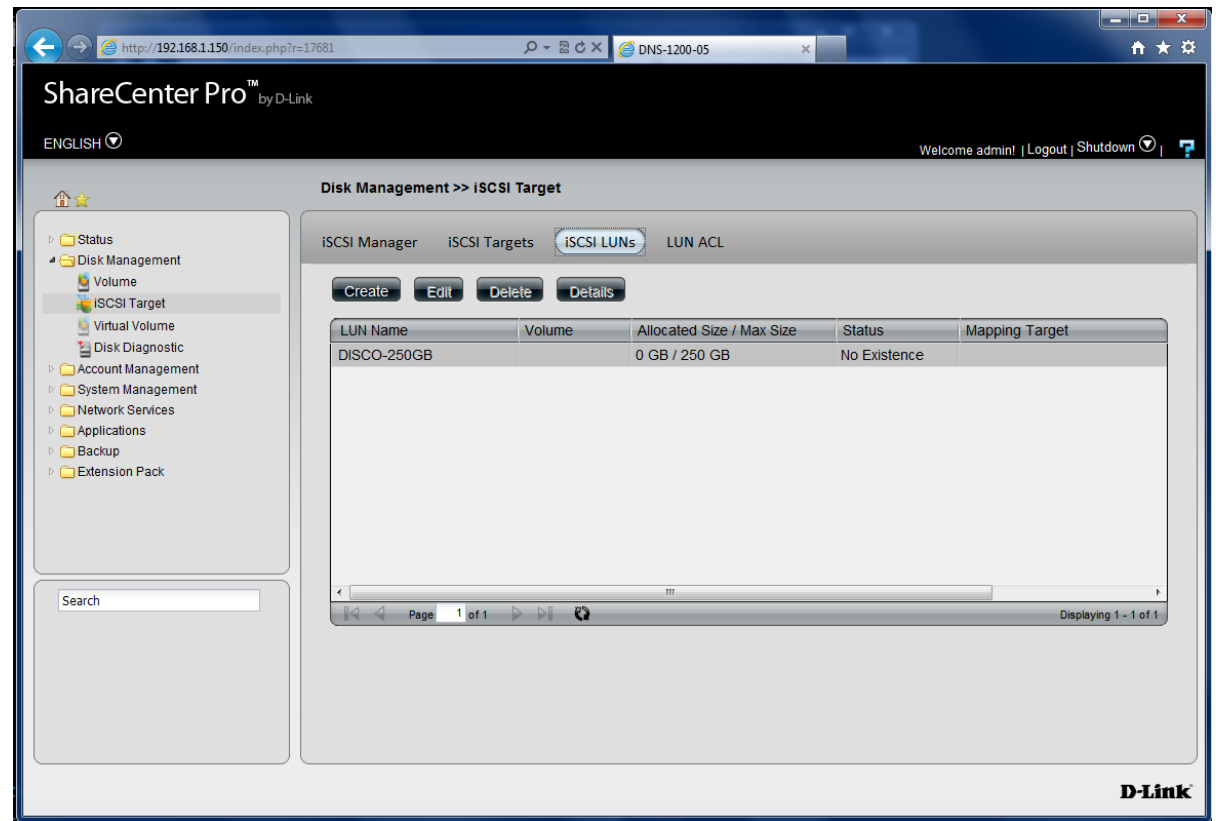

Thin Provisioning

Assign Space to a iSCSI unit

Once the Volume is created on the Unit is possible to allocate an specific amount of space for been use as SAN and the rest for the Volume or use the maximum available space of the Volume on the iSCSI unit and let the space allocation to the storage unit.

If the NAS space needs grows faster than SAN the storage unit will use the available space as NAS or vice versa.

Total Backup Capabilities

➤ DNS-1100-04 and DNS-1200-05 provide the following data backup options:

1. Disk to Disk Backup
2. Schedule Snapshot
3. Remote NAS Backup
4. Cloud Amazon S3 Backup

Total Backup Capabilities

Volume Snapshot

Allow the Storage unit to perform up to 10 Snapshots.

Local Back-Up

Allow the unit to perform local back-up. Copying data from 1 Volume to other.

Remote Back-Up

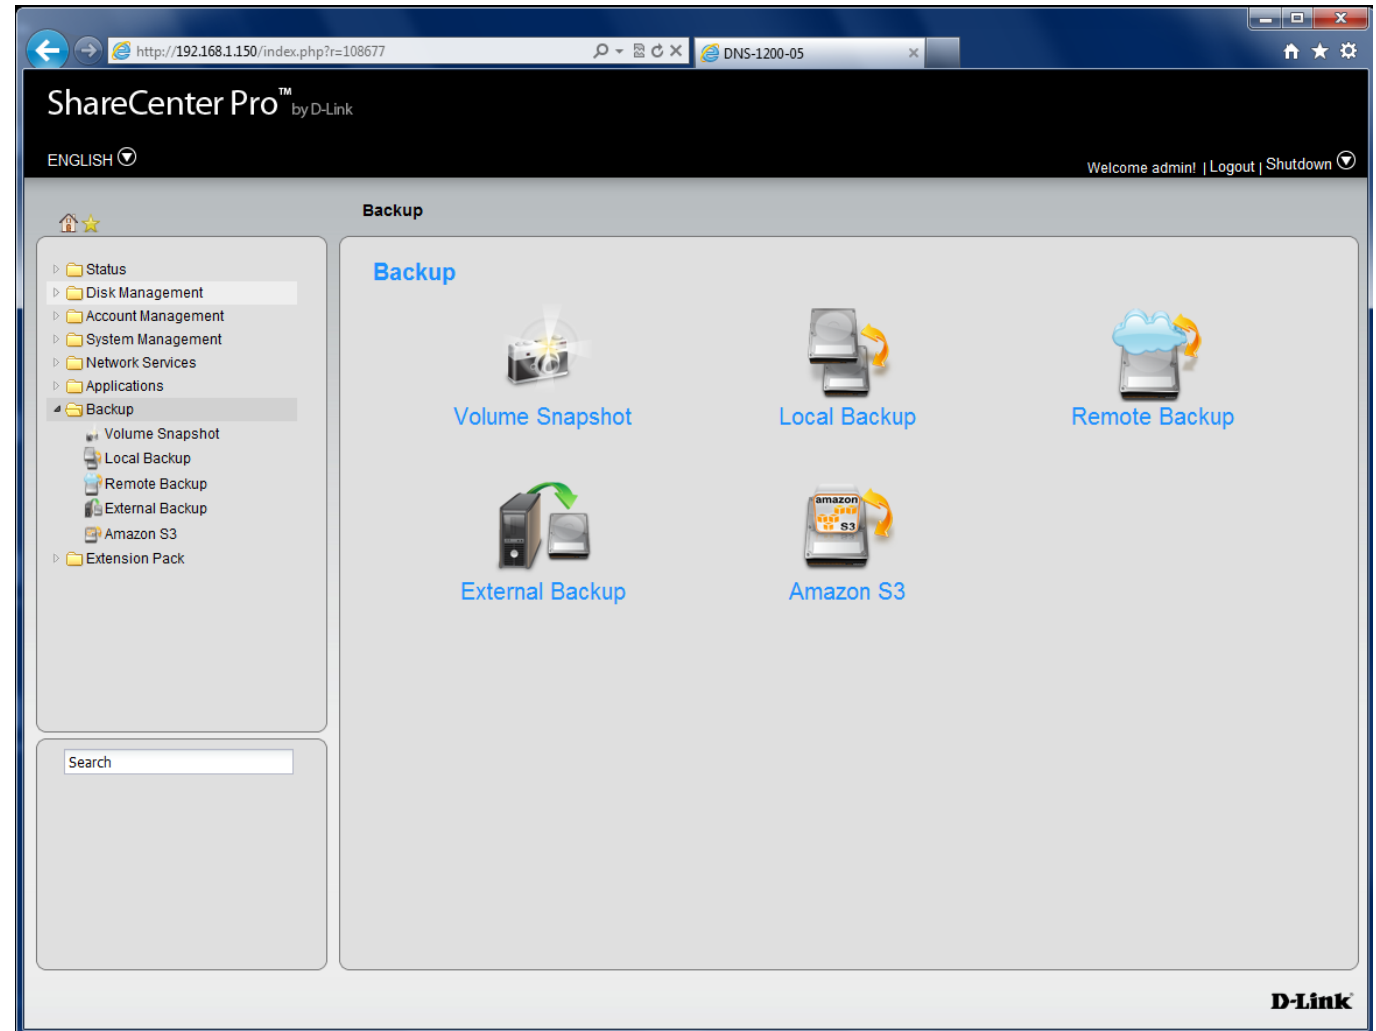

Perform data replication from 1 device to other, the replication can be done from device to device or to a Linux server.

External Back-Up

Perform Back-Up From/To an USB drive to the Storage unit.

Amazon S3

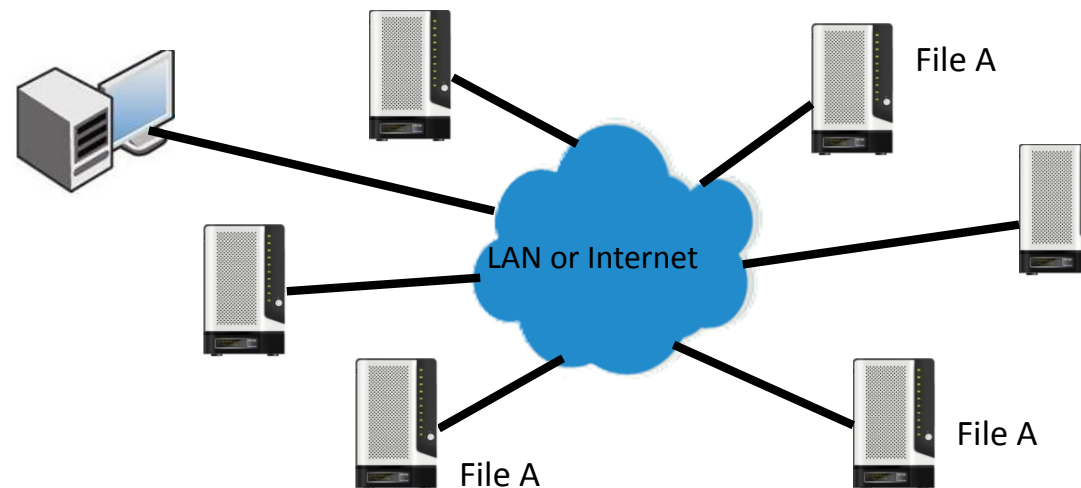

The devices include an Amazon S3 client allowing to perform Cloud Back-Up

Distributed File System

Distributed File System (DFS)

- **Distributed File System** is a set of client and server services that allow an organization to organize many distributed SMB file shares into a distributed file system.
- DFS provides location transparency and redundancy to improve data availability in the face of failure or heavy load by allowing shares in multiple different locations to be logically grouped under one folder, or DFS root.
- **Benefits:** While many client PCs may have the same file, when using DFS, the files appears grouped under one folder. This is for ease of file discovery and for redundancy.

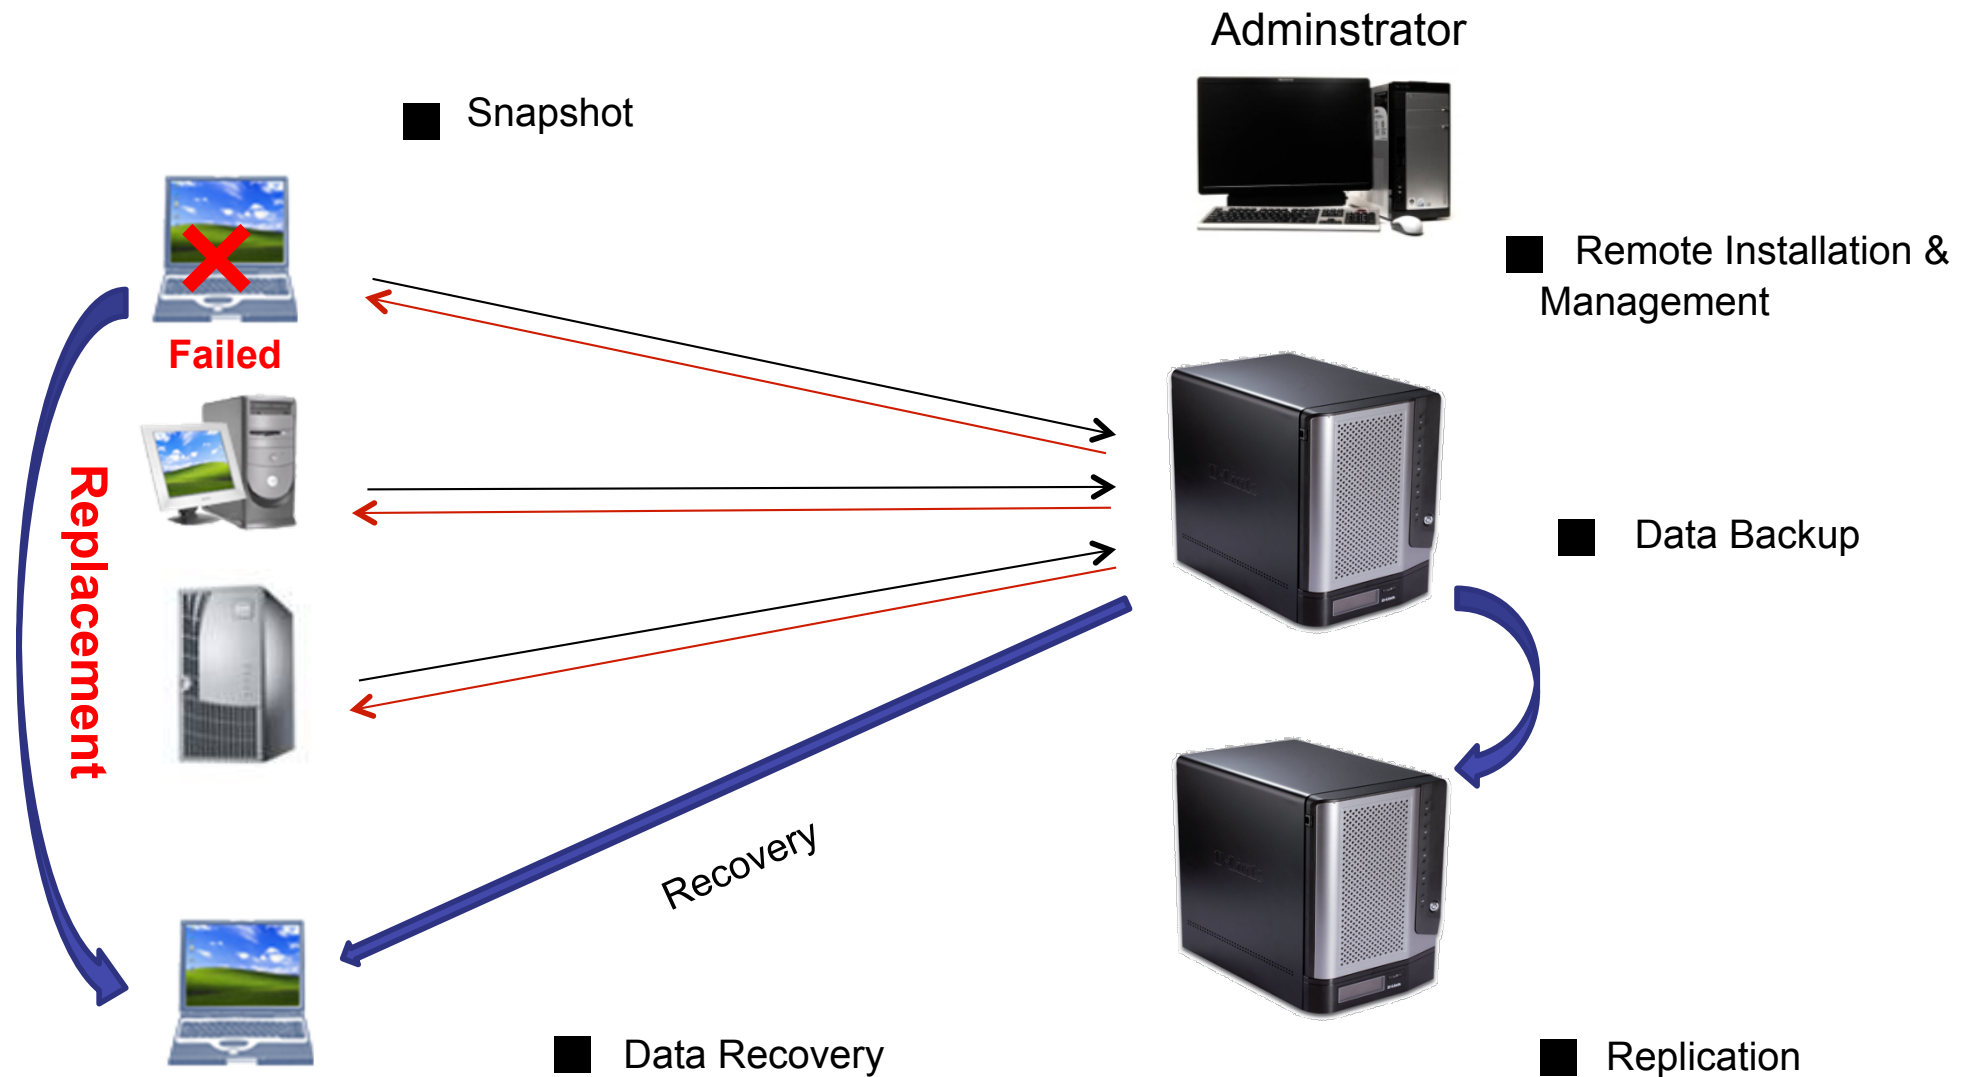

Green Technologies

Green Technologies

- **Hard Drive Hibernation** : Hard Drive Hibernation reduces the power consumption and noise, and also extends the life of the hard drives.
- **Low Power Consumption** : D-Link's NAS devices are powered by low power consumption CPUs and therefore consumes low power when operation.
- **Smart Fan Design** : Smart fan design will automatically adjust the fan speed based on temperature measured to efficiently dissipate the heat and conserve the power.
- **D-Link Green Ethernet** : The Green Ethernet feature, which will be implemented on new D-Link NAS devices, allows the device to optimized power usage based on dynamic detection of cable .
- **Schedule Power On/Off** : The schedule power on/off feature offers the option to flexible operates the device per users' desire.

Farstone Backup & Recovery

Farstone Applications

| User | Issues | D-Link Solution |
|------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| SMB | <ol style="list-style-type: none">1. Virus Attack2. Long OS installation time3. Complicated backup and restore policies4. Data base fail, operation down5. File server damaged6. High cost of replication deployment | <ol style="list-style-type: none">1. Restore from Snapshot2. OS snapshot3. Central management and simple backup plans4. Restore from replication site5. Restore from replication site6. Replication included in the purchase cost of the NAS. |
| Government | <ol style="list-style-type: none">1. Manual data backup from distributed sites.2. Data Security3. Reducing Down time | <ol style="list-style-type: none">1. Central management and backup data2. AES 128, 192 & 256 encryption3. Snapshot & replication |
| Education | <ol style="list-style-type: none">1. Computer returned in a damaged state2. High cost if licenses for each computer | <ol style="list-style-type: none">1. Re-build from back-up2. Unlimited License SKU available |

NAS

New Features Update

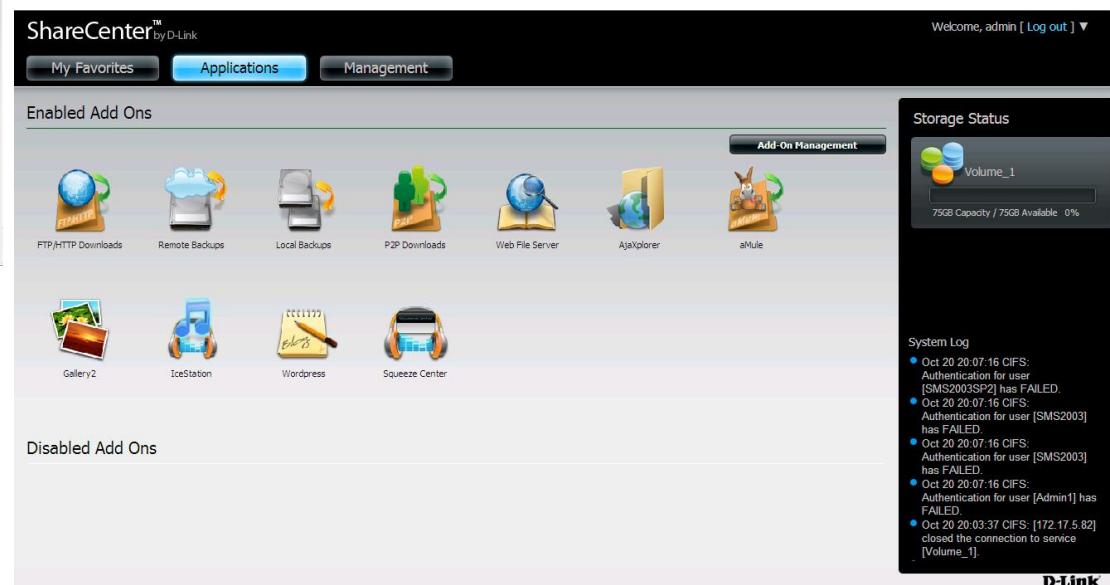

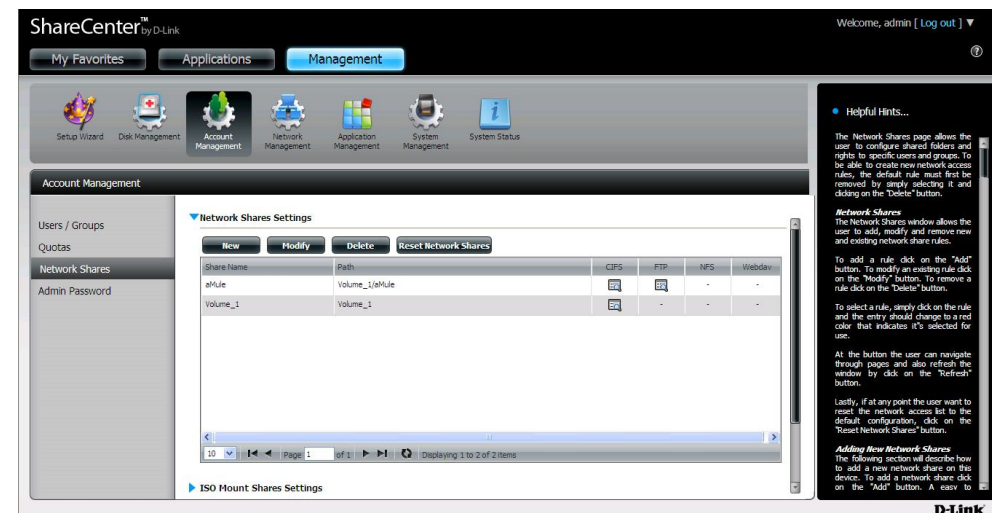

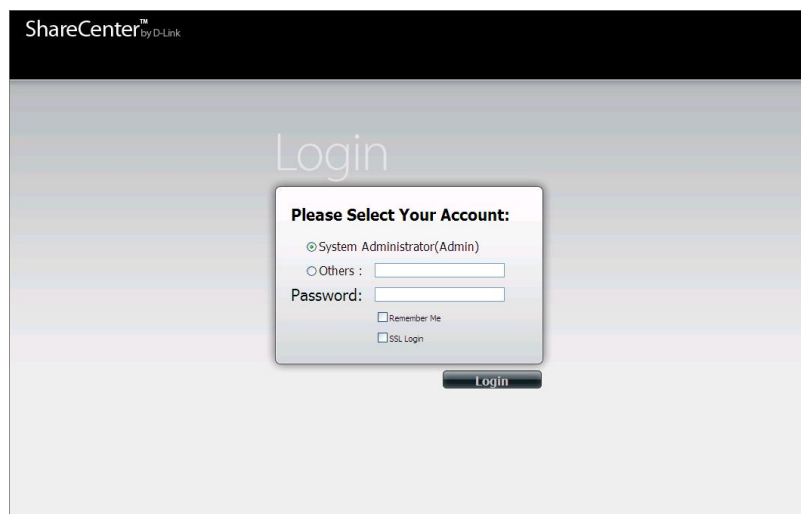

D-Link®

NAS: New Features Update

New GUI design

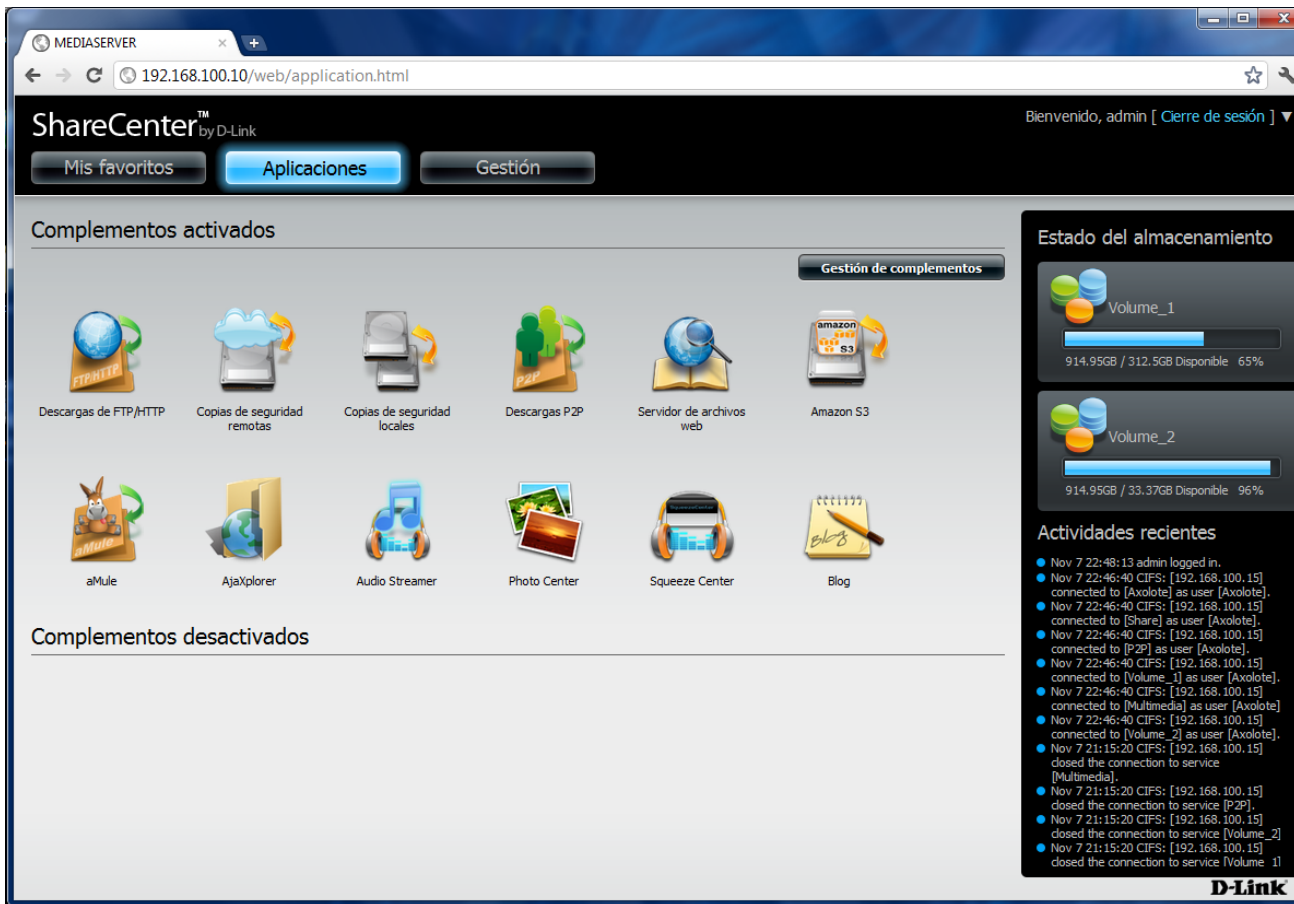

New GUI design will be featured on new NAS devices

NAS: New Features Update

Add-on applications

Customize your NAS with extensive add-on applications

SqueezeCenter
Audio Streaming

Gallery 2
Photo Center

Blog

WEB DAV

AjaXplorer

aMule Download
Manager

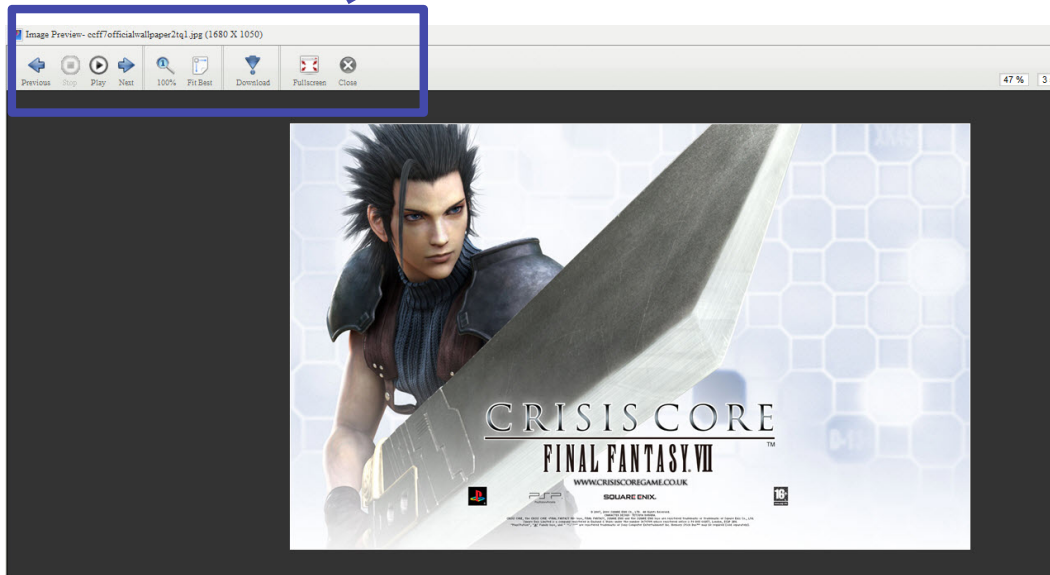

Audio Streamer

NAS: New Features Update

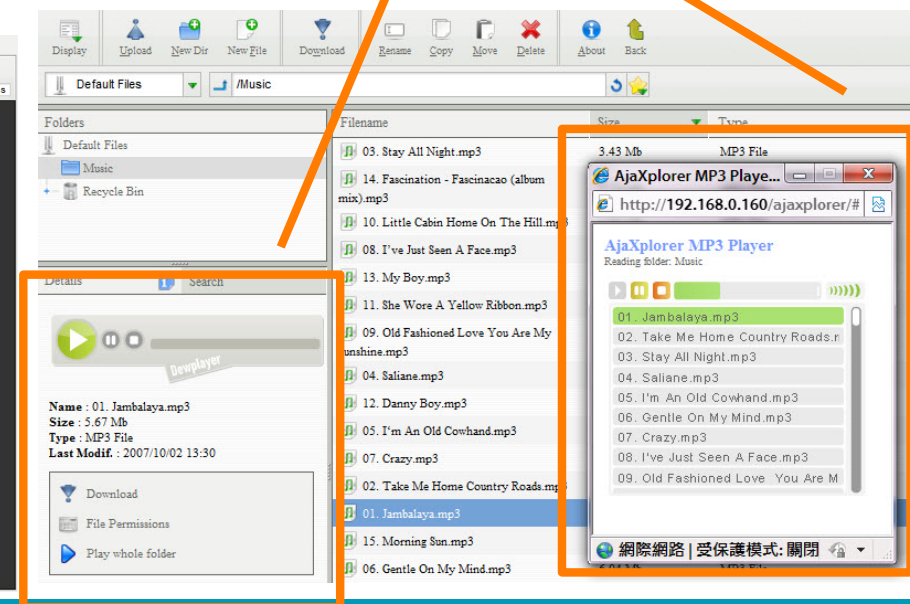

AjaXplorer

- New D-Link Consumer NAS products also integrate the AjaXplorer as an advanced web file server which allowing users to access files through the web interface to the designated folder
- With AjaXplorer, **Audio Streaming** and **Photo slideshow** become possible

Photo Slideshow

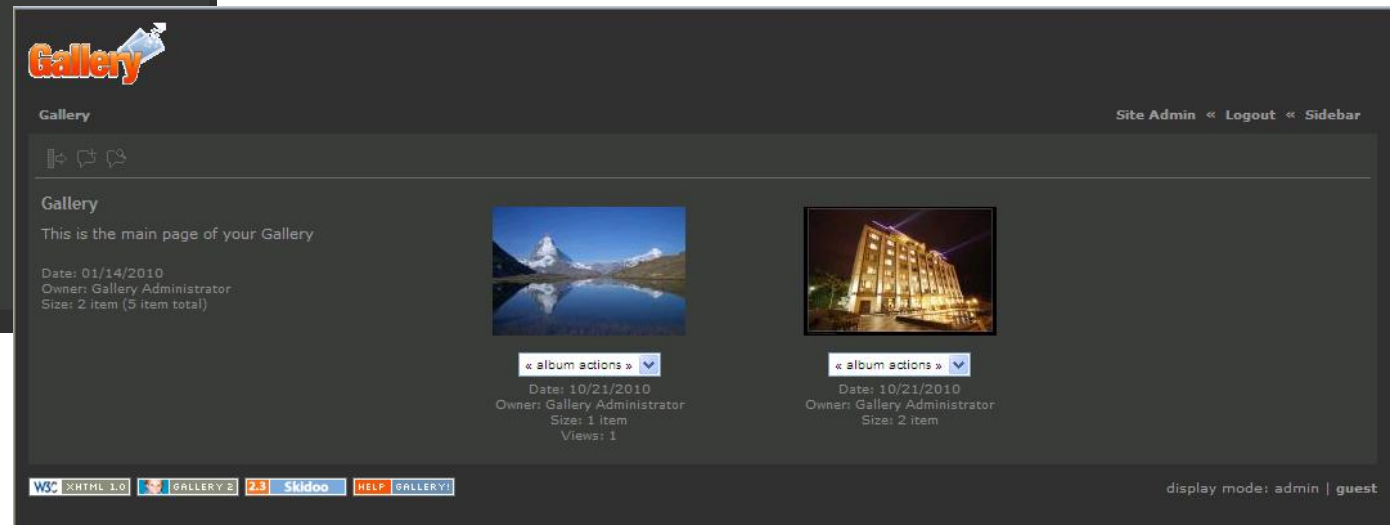

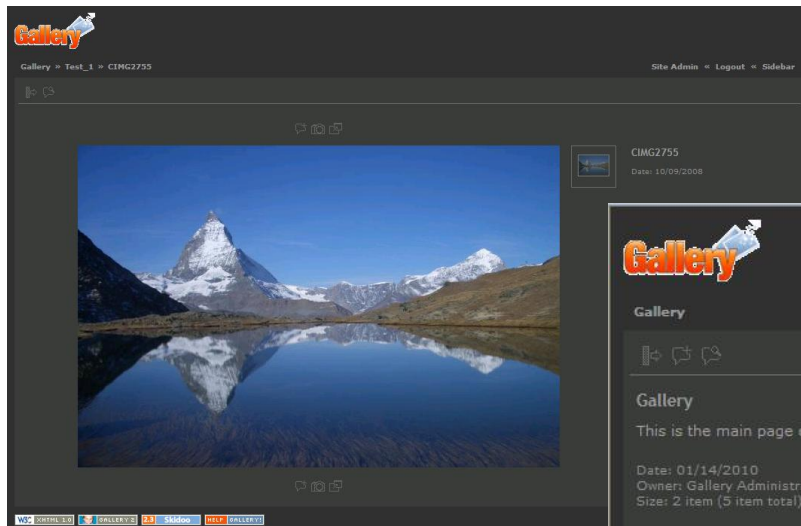

Audio Streaming

NAS: New Features Update

Photo Center

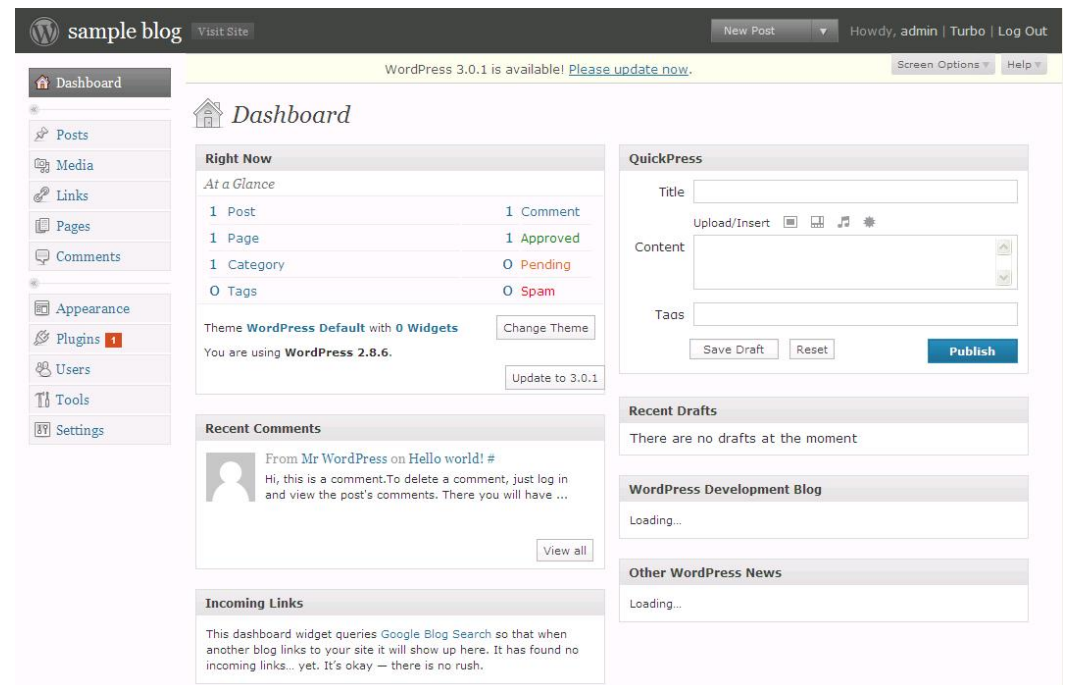

- The **Photo Center** (Gallery) add-on sets up your ShareCenter to share your photos over the web. It provides a convenient interface from which you can create albums of photos with descriptions. The albums are then accessible over the web using HTTP so that your family and friends can then view your ShareCenter stored photos from any internet connection.

NAS: New Features Update

Blog (WordPress)

- **WordPress** is web software you can use to create a website or blog. With the WordPress add-on allows you to create your own ShareCenter based customized Blog. Using the ShareCenter's Internet connection the WordPress blog can be accessed and commented on from any Internet connection.

NAS: New Features Update

Enhanced Torrent Download Engine

- New D-Link Consumer NAS products integrates an Enhanced Torrent Download Engine
- Key enhancement includes:
 - ✓ Priority for Download Tasks
 - ✓ Download Service Scheduler (Set Time (by Hour) to Start/Stop Download Service)
 - ✓ Bandwidth Control
 - ✓ Encryption
 - ✓ etc.

NAS: New Features Update

aMule Download Manager

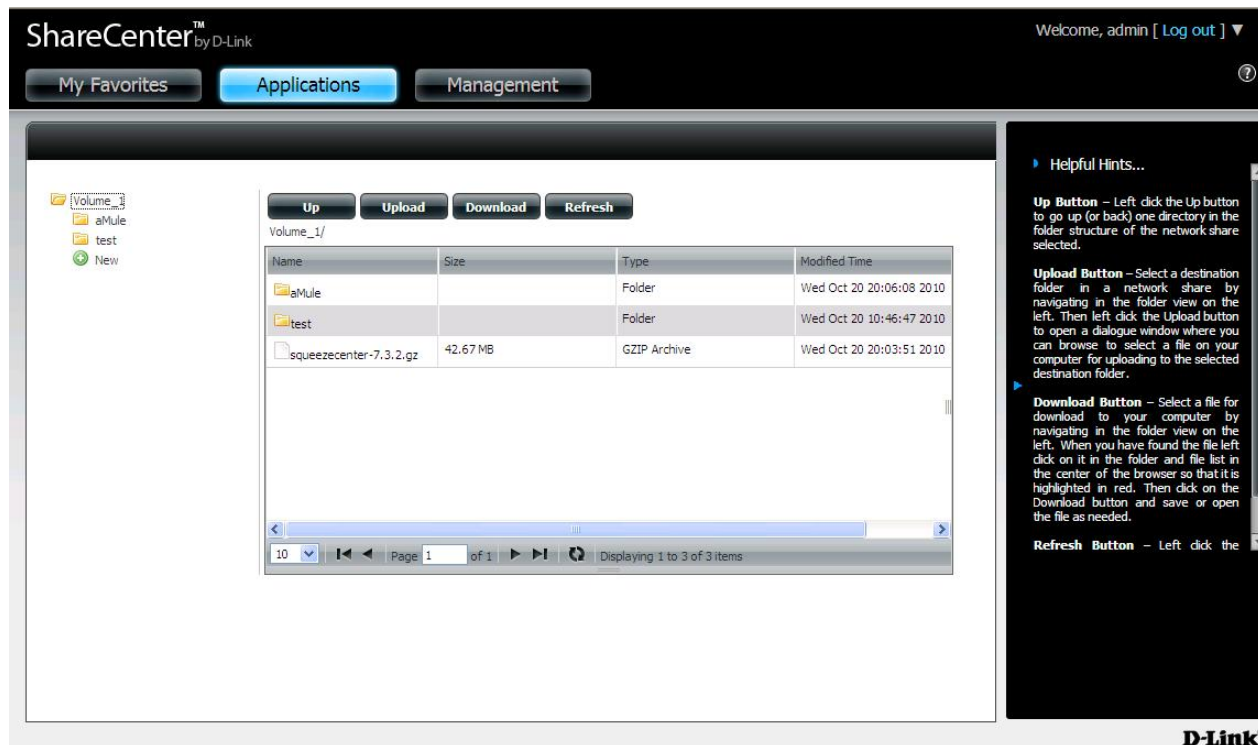

- Web management for aMule download manager

NAS: New Features Update

Web File Server

- New D-Link Consumer NAS products integrate the [Web File Server](#), allowing users to access files through the web interface.
- With DDNS enabled and port 80 forwarding, users can access the file across the Internet to the designated folder.

D-Link

D-Link®

NAS: New Features Update

Apple Time Machine Support

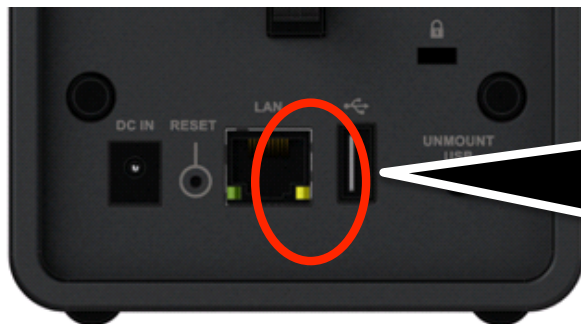

- D-Link Consumer NAS products will support **Apple Time Machine** which allows Apple® users to easily backup any Mac computers running OS X (10.5 or later) using Time Machine.

NAS: New Features Update

External USB Drive Support

- New D-Link Consumer NAS products include one USB 2.0 port, supporting
 - USB Printers
 - External USB Drives
 - UPS Monitoring
- In addition, the ShareCenter supports USB Copy function, allowing users to easily back up your files from the External USB drive (Flash drive or Hard Drive) to the device.
- Simply connect the USB drive to the USB port on the front panel, and then push the **USB Copy Button**. All the data stored in the USB drive will be copied to the ShareCenter.

USB Button:

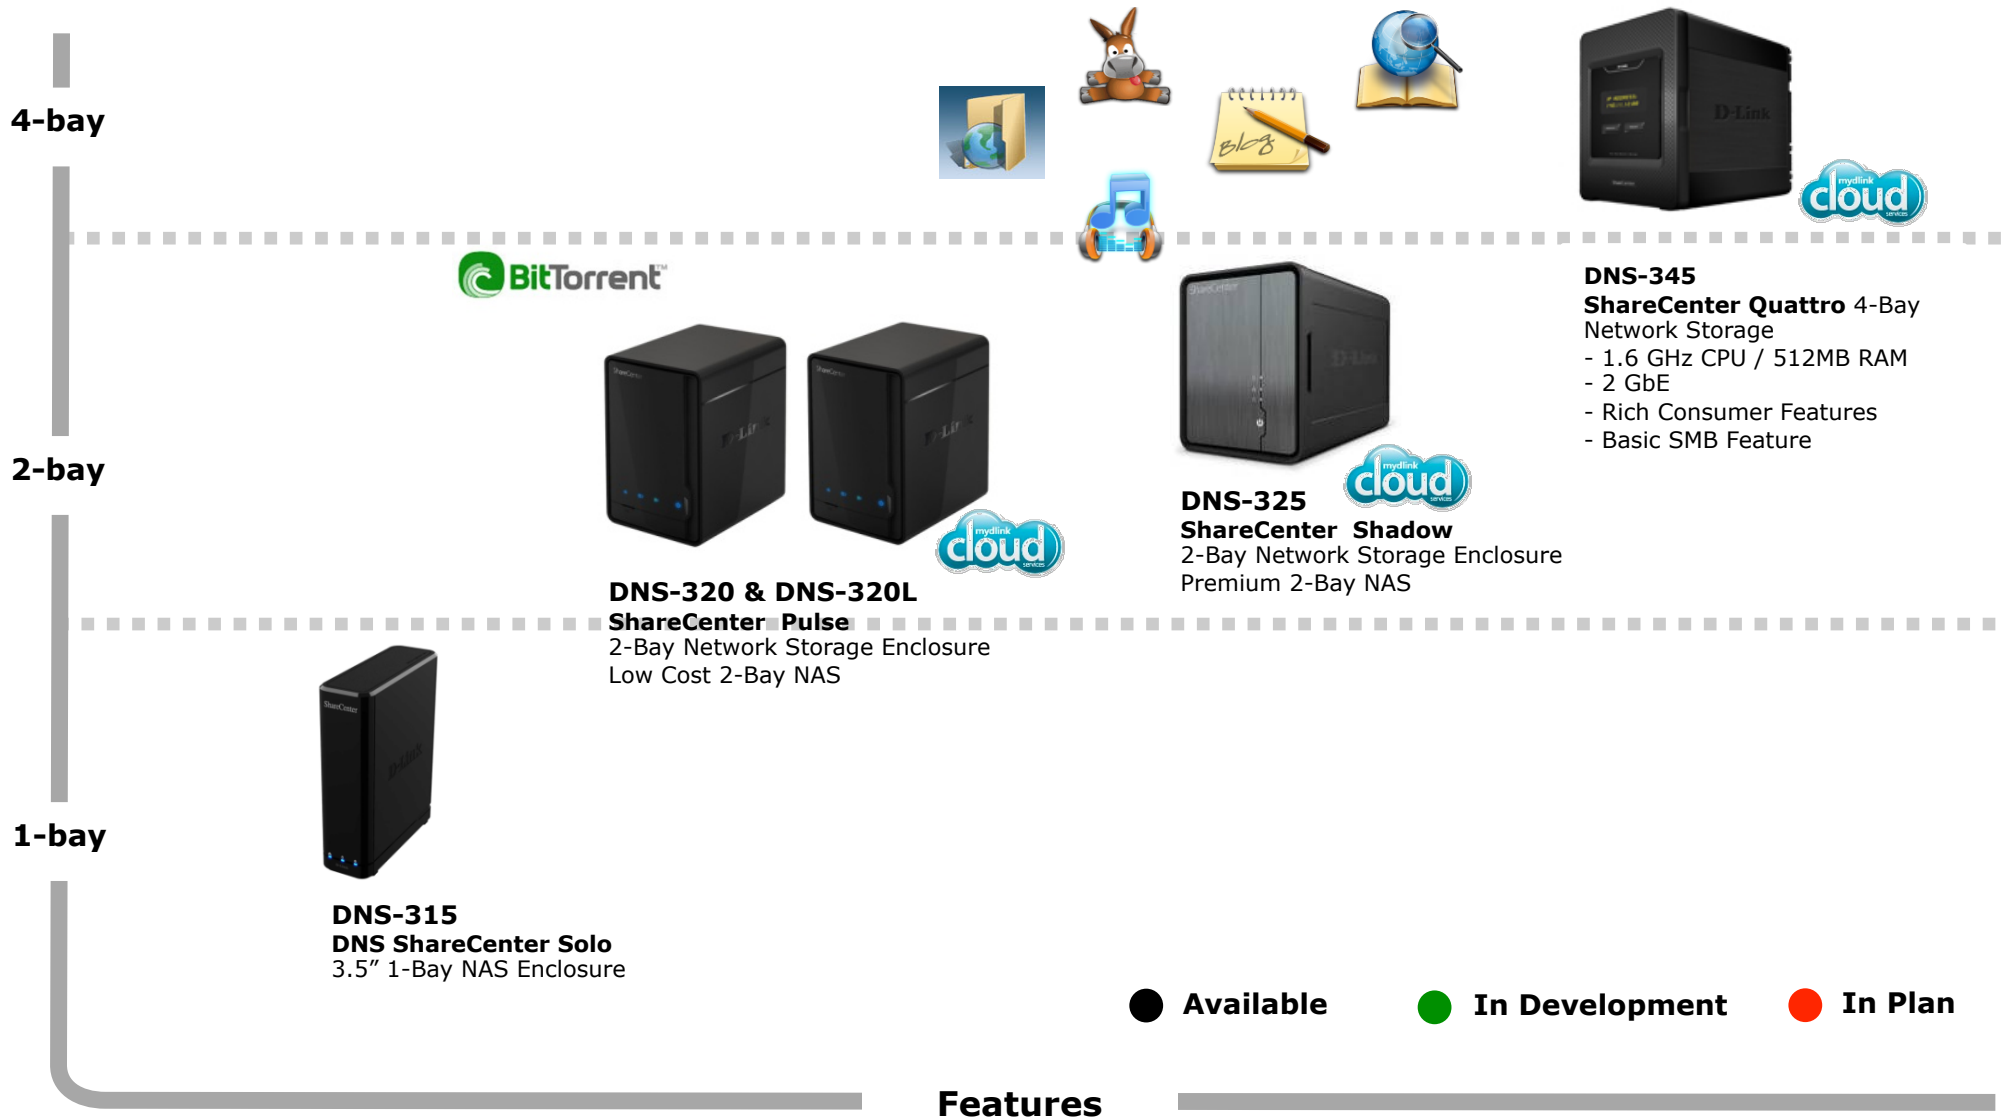

- ✓ **USB Copy:** Press 1 second to copy the data stored in the USB drive to the ShareCenter Pulse
- ✓ **USB Un-mount:** Press over 5 second to safely un-mount the attached USB drive.

Product Portfolio

D-Link®

Product Portfolio NAS Storage

DNS-320 ShareCenter Pulse

Device Interfaces

- 1 Gigabit Ethernet port
- 1 USB 2.0 port
 - supports External USB
 - USB copy button
 - Print server
 - UPS Monitoring

Networking Features

- DDNS
- FTP, CIFS/SMB, NFS, AFP
- NTP
- HTTP/ HTTPS
- PnP-X, LLTD, Bonjour, UPnP
- Users/Groups
- Quotas

Disk management

- Two 3.5-inches SATA Standard Drive with capacity support up to 3 TB
- RAID 0/1, Standard and JBOD
- RAID Migration
- Disk Diagnostics (S.M.A.R.T)

Additional Features

- UPnP AV Server
- iTunes Server
- FTP Server
- NFS Server
- Peer-to-Peer Download Engine
- Remote Access
- Web File Manager
- Network Access Management
- Syslog
- Email Alerts
- Yahoo! Widget
- Power Management (Disk spin-down, Auto Power Recovery, Schedule Power off, Smart Fan, Green Ethernet)
- Media Server (DLNA certification candidate)

DNS-320L mydlink

Device Interfaces

- 1 Gigabit Ethernet port
- 1 USB 2.0 port supports External USB
 - USB copy button
 - Print server
 - UPS Monitoring

Networking Features

- DDNS
- FTP, CIFS/SMB, NFS, AFP
- NTP
- HTTP/ HTTPS
- PnP-X, LLTD, Bonjour, UPnP
- Users/Groups
- Quotas

Disk management

- Two 3.5-inches SATA Standard Drive with capacity support up to 3 TB
- RAID 0/1, Standard and JBOD
- RAID Migration
- Disk Diagnostics (S.M.A.R.T)

Additional Features

- UPnP AV Server
- iTunes Server
- FTP Server
- NFS Server
- Peer-to-Peer Download Engine
- Remote Access
- Web File Manager
- Network Access Management
- Syslog
- Email Alerts
- Yahoo! Widget
- Power Management (Disk spin-down, Auto Power Recovery, Schedule Power off, Smart Fan, Green Ethernet)
- Media Server (DLNA certification candidate)

DNS-325 ShareCenter Shadow

Device Interfaces

- 1 Gigabit Ethernet port
- 1 USB 2.0 port
 - supports External USB
 - USB copy button
 - Print server
 - UPS Monitoring

Disk management

- Two 3.5-inches SATA Standard Drive with capacity support up to 3 TB
- RAID 0/1, Standard and JBOD
- RAID Migration
- Disk Diagnostics (S.M.A.R.T)

Networking Features

- DDNS
- FTP, CIFS/SMB, NFS, AFP
- NTP
- HTTP/ HTTPS
- PnP-X, LLTD, Bonjour, UPnP
- Users/Groups Quotas

Additional Features

- UPnP AV Server, iTunes Server, Squeeze Center
- FTP Server
- NFS Server
- Peer-to-Peer Download Engine
- Remote Access
- Remote Backup
- Web File Manager
- Network Access Management
- Log system
- Photo Station
- Apple Time Machine
- Email Alerts
- Yahoo! Widget
- USB port supports External USB (Copy Button), Print Server, and UPS monitoring
- Power Management (Disk spin-down, Auto Power Recovery, Schedule Power off, Smart Fan, D-Link Green Ethernet)
- Multi-language support
- DLNA-certified Media Server

DNS-345 ShareCenter Quattro

Device Interfaces

- 2 Gigabit Ethernet port
- 1 USB 2.0 port
supports External USB
 - USB copy button
 - Print server
 - UPS Monitoring

Disk management

- Four 3.5-inches SATA
Standard Drive with capacity
support up to 3 TB
- RAID 0/1/5/10 5+Spare,
Standard and JBOD
- RAID Migration
- Disk Diagnostics (S.M.A.R.T)
- OLED Status Display

Networking Features

- DDNS
- FTP, CIFS/SMB, NFS, AFP
- NTP
- HTTP/ HTTPS
- PnP-X, LLTD, Bonjour,
UPnP
- Users/Groups Quotas

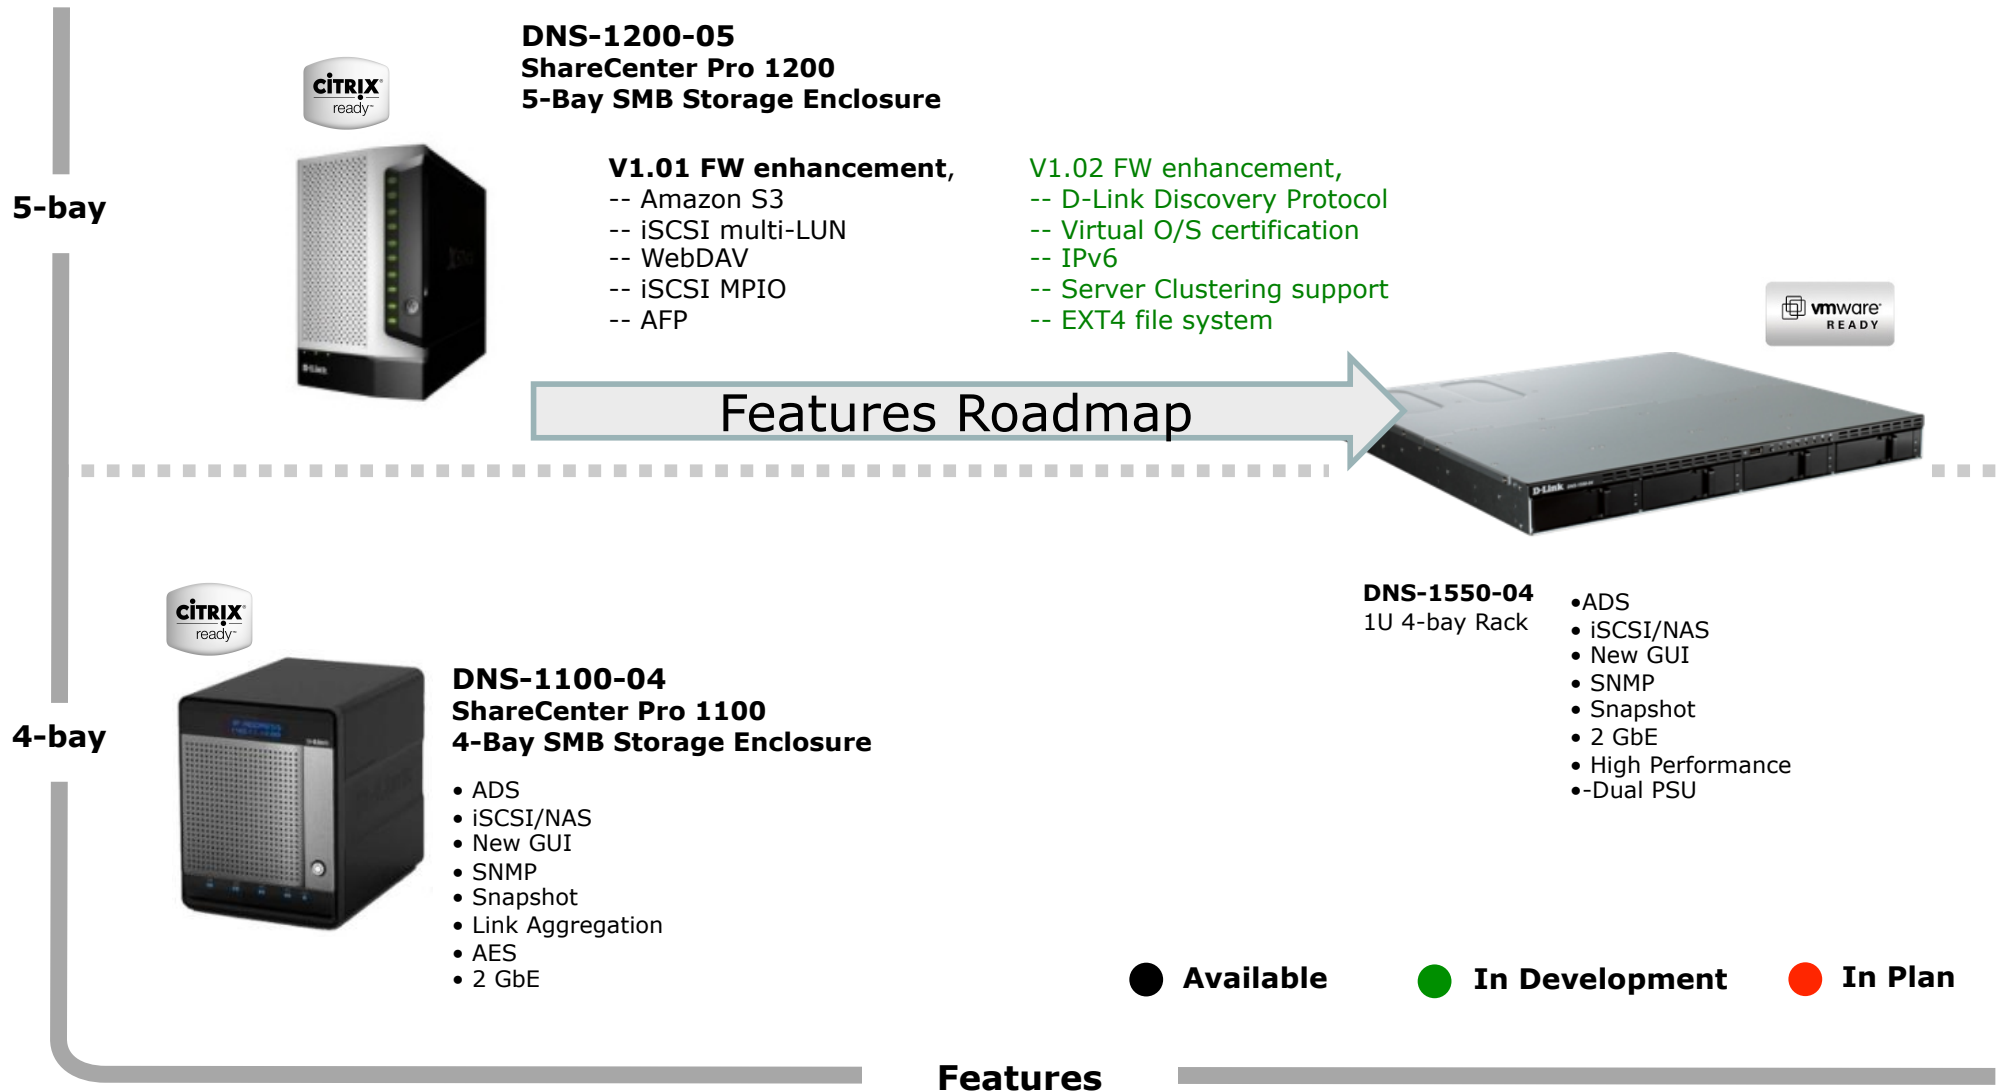

Additional Features

- UPnP AV Server, iTunes Server, Squeeze
Center
- FTP Server
- NFS Server
- Peer-to-Peer Download Engine
- Remote Access
- Remote Backup
- Web File Manager
- Network Access Management
- Log system
- Photo Station
- Apple Time Machine
- Email Alerts
- Yahoo! Widget
- USB port supports External USB (Copy
Button), Print Server, and UPS
monitoring
- Power Management (Disk spin-down,
Auto Power Recovery, Schedule Power
off, Smart Fan, D-Link Green Ethernet)
- Multi-language support
- DLNA-certified Media Server
- Active Directory Support
- DFS Support

Product Portfolio NAS/SAN Storage

DSN-1100-04

Windows Server 2008

 **25 YEARS**
of technology & innovation

D-Link®

DNS-1100-04

Disk management

- Four 3.5-inches SATA Standard Drive with capacity support up to 3 TB
- RAID 0/1/5/6/10 5+Spare, Standard and JBOD
- RAID Migration
- Disk Diagnostics (S.M.A.R.T)
- OLED Status Display

Device Interfaces

- 2 Gigabit Ethernet port
- 1 USB 2.0 port
 - supports External USB
 - USB copy button
 - Print server
 - UPS Monitoring

Networking Features

- DDNS
- FTP, CIFS/SMB, NFS, AFP
- NTP
- HTTP/ HTTPS
- PnP-X, LLTD, Bonjour, UPnP
- Users/Groups Quotas

Windows Server 2008

Additional Features

- Remote Backup
- Web File Manager
- Network Access Management
- Log system
- Email Alerts
- Power Management (Disk spin-down, Auto Power Recovery, Schedule Power off, Smart Fan, D-Link Green Ethernet)
- Multi-language support
- Active Directory Support
- Remote Access
- Unified Storage Design
- Dual Giga LAN
- DFS Support
- Green Technology
- Snapshot
- Thin Provisioning
- Encryption
- Great Performance
- Total Backup Solution

D-Link®

DSN-1200-05

Windows Server 2008

D-Link®

DNS-1200-05

Disk management

- Five 3.5-inches SATA Standard Drive with capacity support up to 3 TB
- RAID 0/1/5/6/10 5+Spare, Standard and JBOD
- RAID Migration
- Disk Diagnostics (S.M.A.R.T)
- OLED Status Display

Device Interfaces

- 2 Gigabit Ethernet port
- 1 USB 2.0 port supports External USB
 - USB copy button
 - Print server
 - UPS Monitoring

Networking Features

- DDNS
- FTP, CIFS/SMB, NFS, AFP
- NTP
- HTTP/ HTTPS
- PnP-X, LLTD, Bonjour, UPnP
- Users/Groups Quotas

Additional Features

- Remote Backup
- Web File Manager
- Network Access Management
- Log system
- Email Alerts
- Power Management (Disk spin-down, Auto Power Recovery, Schedule Power off, Smart Fan, D-Link Green Ethernet)
- Multi-language support
- Active Directory Support
- Remote Access
- Unified Storage Design
- Dual Giga LAN
- DFS Support
- Green Technology
- Snapshot
- Thin Provisioning
- Encryption
- Great Performance
- Total Backup Solution

DNS-1200-05 Performance

D-Link in-house testing using IOZone
vs
smallnetbuilder.com RAID 5 file copy write /read performance

| | Write (MB/s) | Read (MB/s) |
|--------------------------------|--------------|-------------|
| DNS-1200-05 | 81.92 | 72.79 |
| Netgear RNDU4000 | 64.5 | 94.90 |
| Netgear NVX | 51.6 | 98.6 |
| Buffalo TeraStation III | 24.0 | 55.1 |
| Buffalo TeraStation ES | 23.8 | 39.90 |
| Iomega StoreCenter Ix4-200d | 20.90 | 45.70 |

Higher Write Performance is better for back-Up applications and CCTV Environments
Higher Read Performance is better for general purpose storage

DNS-1200-05

- **DNS-1200-5 is optimized for data protection applications:**
- 5 drives means we can offer the same available capacity but with added protection:
 - 4 x 1TB RAID 5 = 3TB usable capacity
 - 5 x 1TB RAID 5 = 4TB usable capacity or **3TB RAID 6**
- RAID-6 ensures you still have access to your data if 2 drives fail (and most people will use low cost SATA drives that have low MTBF so are more likely to fail)
- Performance tuned to optimise write performance for reduced back-up time
- Includes Snapshots for fast restore in the event of a failure
- Includes Farstone back-up software so users can simply back-up their valuable data
- Includes remote back-up so you can copy your data to another location for disaster recovery applications (in case of fire or theft)

DSN-1550-04

Windows Server 2008

DNS-1550-04

Disk management

- Four 3.5-inches SATA Standard Drive with capacity support up to 3 TB
- RAID 0/1/5/6/10, Standard and JBOD
- RAID Migration
- Disk Diagnostics (S.M.A.R.T)
- OLED Status Display

Device Interfaces

- Redundant power supply
- 2 Gigabit Ethernet port
- 5 USB 2.0 port supports External USB
 - USB copy button
 - Print server
 - UPS Monitoring

Networking Features

- DDNS
- FTP, CIFS/SMB, NFS, AFP
- NTP
- HTTP/ HTTPS
- PnP-X, LLTD, Bonjour, UPnP
- Users/Groups Quotas

Additional Features

- Remote Backup
- Web File Manager
- Network Access Management
- Log system
- Email Alerts
- Power Management (Disk spin-down, Auto Power Recovery, Schedule Power off, Smart Fan, D-Link Green Ethernet)
- Multi-language support
- Active Directory Support
- Remote Access
- Unified Storage Design
- Dual Giga LAN
- DFS Support
- Green Technology
- Snapshot
- Thin Provisioning
- Encryption
- Great Performance
- Total Backup Solution
- IPV6
- MySQL
- DLNA
- P2P Downloads

DNS-1550-04 Hardware Specification

| Item | Specification |
|---------------------|--------------------------------------------|
| CPU | Intel Atom D525 Dual-Core 1.8 GHz |
| RAM | 2 GB |
| Flash | 256 MB |
| # of HDD | 4, support SATA II HDD. |
| VGA | Yes (for debug only) |
| USB | Front x 1/Rear x 4 |
| Ethernet Port | Gigabit x 2 |
| Power Supply | 250 W (80 PLUS Certified) x 2 (Redundancy) |
| Enclosure Dimension | 1U Rack |
| Chassis | Metal |
| Button | Power, One-Touch Backup, Reset |

DNS-1550-04 Software Specification

| Category | Functionality & Feature |
|------------------------|--------------------------------------------------------------------------------------------------------------------------------|
| RAID Level | 0, 1, 5, 6, 10,1E |
| RAID Management | PDM, online RAID level Migration, online Capacity Expansion, Synchronization, DDF |
| iSCSI | Target/Initiator, CHAP, LUN Mapping/Masking, SPC-3, MPIO |
| Network | IPV4, IPV6, Load Balance, Fail Over, IEEE 802.3ad, Balance XOR, LLTD |
| Network File Sharing | SMB/CIFS, AFP, NFS, WebDAV, FTP server, |
| System Management | Telnet, SSH, LCD Configuration, Setup Wizard, Firmware Upgrade |
| Backup Solution | NAS remote backup, External Flash backup/restore, Amazon S3, NAS volume Snapshot, Apple Time Machine Support, One-touch backup |
| PXE Server | Yes |
| Backup software Bundle | Acronis Backup and Recovery NAS Edition (for Server and workstation) |
| Disk Management | Wake-on-LAN, Disk Spin Down, MAID 2.0, Media Patrol, HDD S.M.A.R.T |
| File System | XFS |
| Security | System Firewall, Volume Encryption, IP Block, Connection Monitor |
| Application Server | Web Server, SQL, File Management |
| Power Management | Schedule Power on/off, UPS (USB/Ethernet), Auto Power Recovery |
| Account Management | Windows ADs, Open LDAP |
| Language Support | English, German, French, Italian, Spanish, Russian, Japanese, Korean, Traditional Chinese, Simplified Chinese |

DNS-1550-04

Unified NAS and IP-SAN solution.

- Enterprise class RAID protection
- Best-in-class iSCSI performance

Designed for SMB environments that need the simplicity and affordability of Networked Storage

- Intuitive GUI design
- Hot swappable modular accessories

Enhanced features to enable users to secure their valuable data include:

- S.M.A.R.T monitoring of drives to warn users of impending drive failures
- Comprehensive backup solution; snapshot, replication, cloud backup, etc.
- Includes Acronis Backup software.
- USB log retrieval

Green NAS: MAID 2.0 & 80 plus power supply

Enterprise Class RAID Protection

- RAID 0/1/10/5/6, JBOD
- RAID level migration & Recovery
- Media Patrol: Scan media surface to make sure data is intact
- Predictable Data migration and SMART

What is Predictable Data migration, PDM?

Through the PDM system, hard disk drives incorporate a suite of advanced diagnostics (i.e. S.M.A.R.T) that monitor the internal operations of a drive and provide an early warning for many types of potential problems. When a potential problem is detected, the hard drive can be repaired or replaced **before any data is lost or damaged.**

Best –in-Class iSCSI Performance

DNS-1550-04 write performance av. 108 MB/s is higher than competitors listed on SmallNetBuilder.com

Intuitive Graphic User Interface

Simplified Management – no special IT skills needed

The screenshot displays the D-Link storage management web interface. The top navigation bar includes links for Dashboard, Device, Storage, AdminTool, and NAS. The main content area is divided into several sections:

- System Status:** A sidebar on the left showing the health of various components. A warning icon indicates "This system has encountered errors!". Components listed include Controller, Voltage, Temperature, PSU, Cooling Unit, Disk Array, Logical Drive, and Physical Drive, each with a corresponding status icon (green for OK, red for error).
- Event Information:** A table listing system events.
- Storage Overview:** A section showing a pie chart for capacity utilization and a table of storage components.

Annotations with arrows point to specific features:

- Dashboard & wizard:** Points to the top navigation bar.
- Event Log:** Points to the Event Information table.
- Capacity Utilization:** Points to the Storage Overview section, specifically the pie chart and table.
- Health condition of Major component:** Points to the System Status sidebar.

| Device | Severity | Time | Description |
|---------------|----------|-----------------------|-----------------------------|
| Port 2 Ctrl 1 | Info | Jan 12, 2011 08:38:29 | Host interface link is up |
| Port 2 Ctrl 1 | Info | Jan 12, 2011 08:38:27 | Host interface link is down |
| Port 2 Ctrl 1 | Info | Jan 12, 2011 08:38:13 | Host interface link is up |
| Ctrl 1 | Info | Jan 12, 2011 08:38:01 | The system is started |

| Device | Number Present |
|-----------------|----------------|
| Controllers | 1 |
| Disk Arrays | 1 |
| Logical Drives | 1 |
| Physical Drives | 6 |
| Spare Drives | 0 |

Storage Capacity Details:

- Total Physical Capacity: 1.60 TB
- Unconfigured: 0 Bytes
- Configured: 1.60 TB

Hot swappable Modular Design

Hot swappable modular accessories, Easier for field maintenance

Comprehensive Backup Solution

- Workstations/ Servers backup
- Volume Snapshot
- Rsync between Storages
- Cloud backup to Amazon S3

USB log Retrieval

TWO STEPS to retrieve system log:

Plugin the pen drive to NAS

“USB Retrieval” will export the system log (*.html) to pen drive automatically.

Green NAS: MAID 2.0 & 80 plus power supply

MAID 2.0 helps users accomplish effective green storage practices.

MAID stands for **M**assive **A**rray of **I**dle **D**isks, and is a technology used in large disk subsystems where disk drives not in active use at any given time are automatically switched off to save power.

D-Link®

Introducing DSN-6000 Series

Overview

The DSN-6000 series is a range of high performance, fully redundant storage solutions that are simple to deploy and manage.

All DSN-6000 storage solutions are supplied complete with Snapshot capabilities and remote replication as standard so no need for additional licenses, and each RAID controller is equipped with 4GB cache to ensure maximum performance straight out of the box.

Target Market

Small to Medium Businesses that need constant data availability but may have limited IT experience.

Small to Medium Enterprises that need secondary storage for back-up or disaster recovery applications.

Introducing DSN-6000 Series

2U 12 bay form factor

Fully redundant & hot swappable design

- Single or Dual RAID controllers with battery backup modules
- Hot Swappable Power supplies
- Replaceable Fan modules

Two variants: 4 x 1GbE or 2 x 10GbE iSCSI ports per controller

- load balancing & failover

Up to 220K IOPS & 1300MB/Sec. throughput

Advanced data protection:

- Full RAID level support including RAID 0,1,0+1,3,5,6,10,30,50, 60, JBOD,
- Snapshots: with Windows VSS support
- Replication (1 to 1 and 1 to Many)
- Vmware, Citrix and Microsoft Certification

Scalable up to 60 drives or 5 enclosures

Green Design

- Auto disk spin down
- Advanced cooling mechanism
- 80 PLUS energy-efficient power supplies

DSN-6110 & DSN-6410

- › Single Controller Solutions
- › Host connectivity
 - 4 x 1GbE ports (DSN-6110)
 - 2 x 10GbE ports (DSN-6410)
- › Disk connectivity
 - 12 hot-swap drive bays supporting SAS and SATA II drives
- › Performance:
 - DSN-6110: 500 MB/Sec
120,000 IOPS
 - DSN-6410: 650 MB/Sec
130,000 IOPS
- › Cache Memory
 - 4GB as standard
 - Battery backup – 72 hours
- › Dual Redundant hot swappable 500W power supplies

DSN-6110

DSN-6410

DSN-6120 & DSN-6420

- › Dual Redundant Controller Solutions
- › Host connectivity
 - 8 x 1GbE ports (DSN-6120)
 - 4 x 10GbE ports (DSN-6420)
- › Disk connectivity
 - 12 hot-swap drive bays supporting SAS and SATA II drives
- › Performance:
 - DSN-6120: 900 MB/Sec
200,000 IOPS
 - DSN-6420: 1300 MB/Sec
220,000 IOPS
- › Cache Memory
 - 4GB as standard
 - Battery backup – 72 hours
- › Dual Redundant hot swappable 500W power supplies

DSN-6120

DSN-6420

DSN-6110/6120 Feature Highlights

| | |
|-------------------------|----------------------------------------------------------------------------------------------------|
| Host Interface | 8 x GbE iSCSI ports (DSN-6120) 4 x GbE iSCSI ports (DSN-6110) |
| Drive Interface | 12 x SAS or SATA II disks supported |
| RAID Controllers | Single controller, can be upgradable to dual (DSN-6110) Dual-active RAID controllers (DSN-6120) |
| Scalability | SAS JBOD expansion unit |
| Green | Auto disk spin-down, Advanced cooling (FAN speed control) |
| RAID Level | RAID 0, 1, 0+1, 3, 5, 6, 10, 30, 50, 60, and JBOD N-way mirror |
| Compatibility | Support multiple OSes, applications, iSCSI HBA, software iSCSI initiator, and etc. |
| Virtualization | VMware, Hyper-V, Citrix |
| Data Protection | Snapshot (Read-only and Writable), Storage based Replication |
| Connection Availability | Load balancing and failover support on the GbE iSCSI ports |
| Dimension | 442.8 x 500.6 x 88.0 (mm) |
| Power Supply | 2 x 500W redundant PSU |
| Cache Protection | Hot pluggable battery backup module |
| Fan | 2 x Redundant fan module |

DSN-6410/6420 Feature Highlights

| | |
|-------------------------|----------------------------------------------------------------------------------------------------|
| Host Interface | 4 x 10GbE iSCSI ports (DSN-6420) 2 x 10GbE iSCSI ports (DSN-6410) |
| Drive Interface | 12 x SAS or SATA II disks supported |
| RAID Controllers | Single controller, can be upgradable to dual (DSN-6410) Dual-active RAID controllers (DSN-6420) |
| Scalability | SAS JBOD expansion unit |
| Green | Auto disk spin-down, Advanced cooling (FAN speed control) |
| RAID Level | RAID 0, 1, 0+1, 3, 5, 6, 10, 30, 50, 60, and JBOD N-way mirror |
| Compatibility | Support multiple OSes, applications, iSCSI HBA, software iSCSI initiator, and etc. |
| Virtualization | VMware, Hyper-V, Citrix |
| Data Protection | Snapshot (Read-only and Writable), Storage based Replication |
| Connection Availability | Load balancing and failover support on the 10GbE iSCSI ports |
| Dimension | 442.8 x 500.6 x 88.0 (mm) |
| Power Supply | 2 x 500W redundant PSU |
| Cache Protection | Hot pluggable battery backup module |
| Fan | 2 x Redundant fan module |

DSN-6000 family

| Model | Rear view | Controllers | Gigabit iSCSI ports | 10GbE iSCSI ports | Power and cooling |
|-----------------|-------------------------------------------------------------------------------------|-------------|---------------------|-------------------|-------------------|
| DSN-6110 |  | 1 x RAID | 4 | | 2 x Redundant |
| DSN-6410 |  | 1 x RAID | | 2 | 2 x Redundant |
| DSN-6120 |  | 2 x RAID | 8 | | 2 x Redundant |
| DSN-6420 |  | 2 x RAID | | 4 | 2 x Redundant |
| DSN-6020 |  | 2 x I/O | N/A | N/A | 2 x Redundant |

Controllers

Scalable to 60 drives
With Single or Dual
redundant controllers

Direct Attached storage with DSN-6020

Scale capacity as required.

DSN-6020 can be used as a Direct Attached Storage solution to provide simple, cost effective expansion for servers equipped with a SAS RAID controller or Host Bus Adaptor.

DSN-654

› What is DSN-654? (SATA bridge board)

The SAS to SATA bridge board is designed to enable single-ported SATA drives to connect seamlessly like native dual-ported SAS drives for use in enterprise storage systems (DSN-6000 series) using SAS expanders.

› What kind of configurations need DSN-654?

Dual controller configuration (DSN-6120/ DSN-6420) with SATA HDD

Single or Dual controller configuration with SATA HDD >3TB

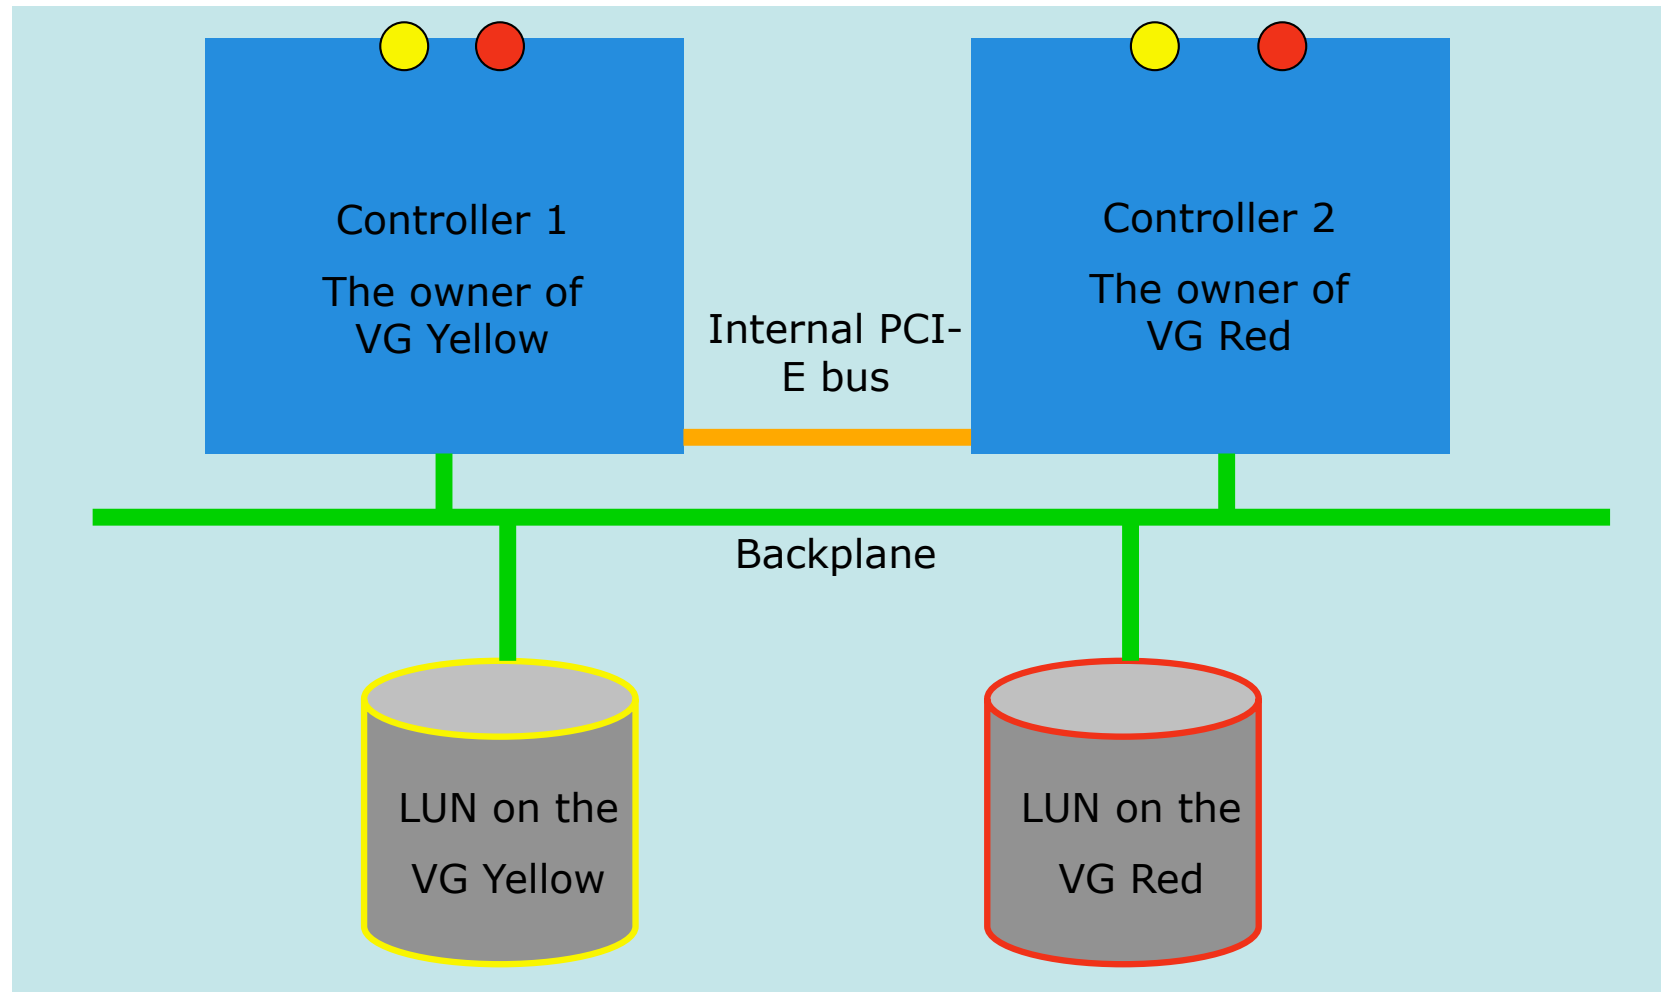

Without DSN-654

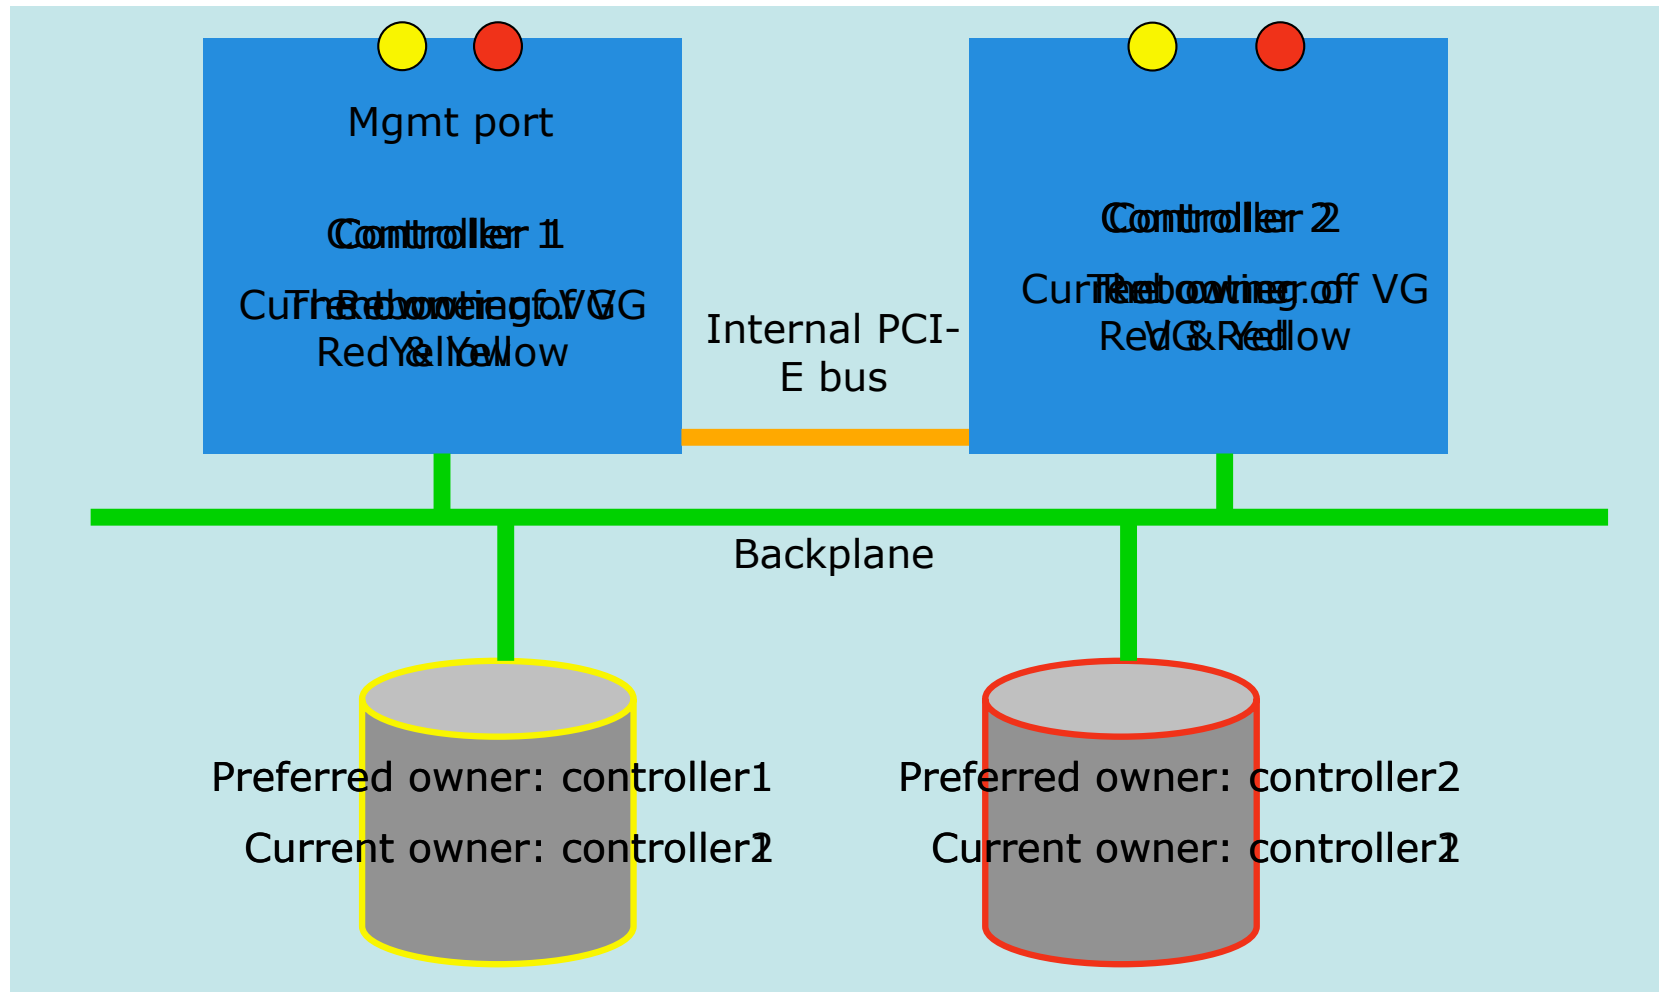

With DSN-654

Dual-controller Active/Active Design

Embedded Service with no additional charge

A-Synchronous data replication technology

- ✓ A-Sync.: Designated time to replicate (differential) data

Full & Incremental replication

Host utility for Microsoft

- ✓ MPIO driver supports: Windows, Linux Multi-pathing, Solaris, Mac

Multi-path support over redundant controller

Backup to any location

Each location can be a source and/or a destination

D-Link Storage - Tried & Tested

"The D-Link DSN-6120 delivers high levels of redundancy and, with all features included in the price, it offers good value as well. SMBs on the hunt for an affordable, fault-tolerant IP SAN disk array with plenty of expansion potential will definitely be impressed."

EXCLUSIVE

D-Link DSN-6120

Offers excellent IP SAN performance and redundancy, plus plenty of potential for expansion – all wrapped up in an affordable package

KEY SPECS

2U rack chassis • 2 x 500W hot-swap power supplies
• 2 x hot-swap fan modules • 12 x SAS/SATA II
hot-swap drive bays. Dual hot-swap RAID controllers
each with: 1.2GHz Intel IOP CPU • 2GB DDR2 cache
upgradeable to 4GB • battery backup
• supports RAID0, 1, 3, 5, 6, 10, 30, 50, 60, JBODs
• 4 x Gigabit Ethernet • 10/100 management port
• mini-SAS expansion port • 3yr RTB warranty.
Options: DSN-6020 12-bay expansion enclosure,
£2,365 exc VAT
