

# How to change language in the manual configuration of DNR-322L

## How to change language in the manual configuration of DNR-322L

- 1) To change the language of the NVR, you need its IP address. You can log in to your router, which may show the information either under DHCP Clients or LAN Clients

If your router does not have this option, you can use the DNR setup wizard to find the DNR's IP address.
