- Comedy Central
- Flickr
- CNET
- CBS
- CNN
- ABC
- BBC
- Joost
- Last.fm
- ... and many more

The DSM-380 Boxee Box provides an easy way to bring multimedia to your television. Simply connect the Boxee Box to the Internet using a wireless or wired connection. Plug in the HDMI cable, and off you go. Boxee's 10-foot user interface allows you to comfortably browse through content from the comfort of your couch. Boxee provides access to content from a wide variety of online sources.

Unlimited Internet Content On Your HDTV

High-definition television sets (HDTVs) are becoming a common sight in the home, yet the amount of High Definition (HD) content available for these televisions is often limited to expensive Blu-ray discs and satellite services. Consumers who want to take their HDTV experience to the next level are turning to Boxee. The Boxee Box allows you to view a wealth of free, high-quality HD content on your HDTV through your home Internet connection. Access content from YouTube, MTV, Shoutcast, and thousands of other on-demand Internet media sources.¹

Multimedia + Social Networking = Awesome

Boxee is the first media center to integrate with social networks such as Twitter and Facebook, allowing you to recommend movies, TV shows, and songs to your friends, and also see which shows they are watching. Boxee's open system means that new content is constantly being added everyday. All of your latest movies, CNN news feeds and more, are available as soon as you turn on your Boxee Box.¹

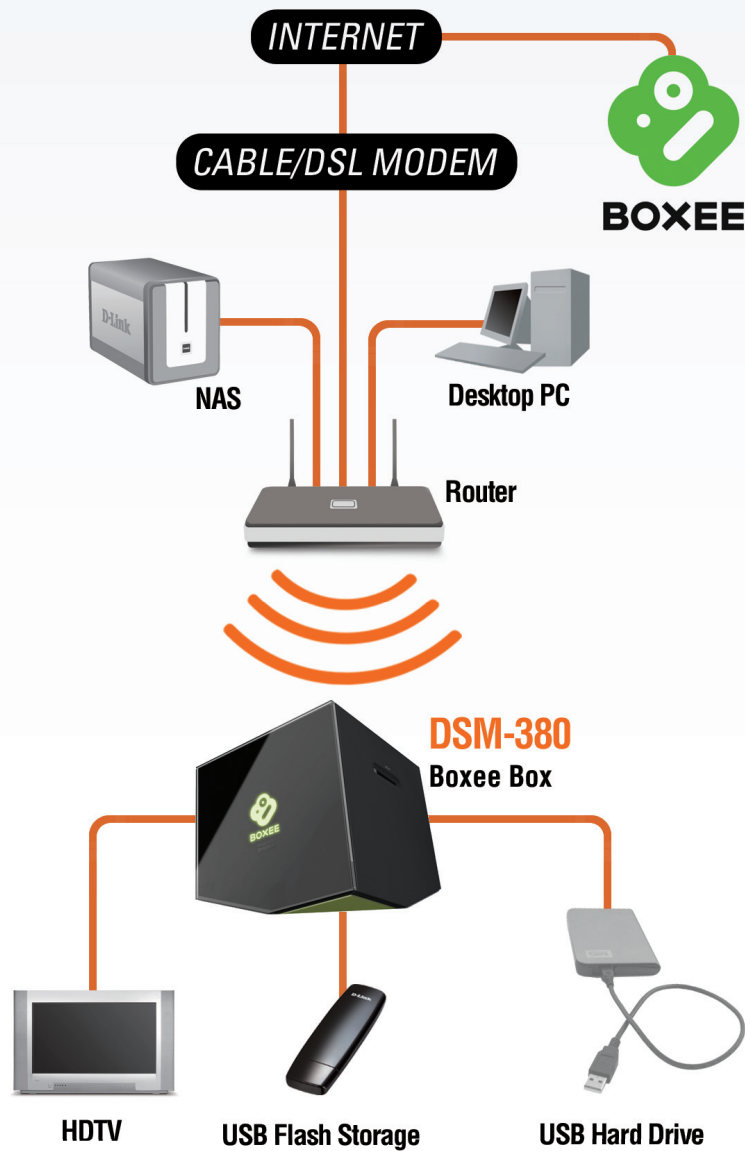

Give Your Media Collection a New Life

If you have your own collection of downloaded multimedia content, Boxee will automatically sort and present it in media library complete with cover artwork, optional subtitles, and synopses. Just connect an external hard drive or flash storage drive via USB, or share media files from your computer over your home network. Move your HD media from your monitor to your living room and enjoy watching your movies in Full HD 1080p resolution.

Easy to Set up and Easier to Use

Wireless N support and an easy-to-connect HDMI interface help to eliminate the typical jumble of unsightly cables. Just plug in the power, connect it to your TV, and the Boxee Box is ready to go. Boxee's famous 10-foot interface, specially designed for HDTV screens, makes it easy to control your Boxee experience from the comfort of your couch. Effortlessly browse the web and enter text using the QWERTY keyboard on the back of the remote.
