1.1 Check Your Package Contents

Your NetDefend Network Security UTM Firewall package should contain all the items listed below. If any of these items is found damaged or missing in your package, report it to your reseller immediately for replacement.

- DFL-260 NetDefend™ Network Security UTM Firewall
- 5V DC Power Adapter
- Console Cable (RS-232 cable)
- Ethernet (CAT5 UTP/Straight Through) Cable
- Ethernet (CAT5 UTP/Cross-over) Cable
- CD-ROM (containing QIG/Manual)
- 2 x NetDefend UTM Subscription (IPS & Anti-Virus)

Identifying Components

<div style="text-align:right">2</div>

The following illustrates the front panel of the DFL-260 and explains the front panel's key components:

2.1 Front View

1. Power LED	Power indication of the DFL-260.
2. Status LED	System status indication of the DFL-260.
3. WAN LED	WAN port status indication of the DFL-260.
4. DMZ LED	DMZ port status indication of the DFL-260.
5. LAN LED	LAN port status indication of the DFL-260.

2.2 Rear View
1. Console Port	Connects to RS-232 console cable that connects to PC.
2. LAN Ports	These are for the connection of Ethernet cables to the internal network.
3. DMZ Port	This is for the connection of an Ethernet cable to an DMZ network.
4. WAN Port	This is for the connection of an Ethernet cable to a Cable or DSL modem.
5. Reset	This is for resetting system configuration to factory defaults.
6. Power Receptor	This is for the connection of the power adaper to a wall outlet or power strip.

⚠ Note:

**WAN interface does not support Auto MDI/MDI-X
(Automatic cable detection for Straight-through and Crossover
function).**

2.3 LED Indicators

LED	Status	Color	Description
Power	Solid green Light off	Green	The device is powered on. The device is powered off.
Status	Solid green Light off Blinking green	Green	System is operating properly. The device is not working. System is defective, such firmware upgrade fail.
WAN	Solid green Blinking green Light off	Green	Link present Port is sending or receiving data. No link
DMZ	Solid green Blinking green Light off	Green	Link present Port is sending or receiving data. No link
LAN	Solid green Blinking green Light off	Green	Link present Port is sending or receiving data. No link

2.4 Default Interface Attribute Definition

Wording on Front plate	Default name in firewall	Default interface type definition	Default interface IP Address	Default DHCP Status
WAN	WAN	DHCP client	N/A	Enabled
DMZ	DMZ	Static IP	172.17.100.254/24	Disable
Ports: 1~4	LAN	Static IP	192.168.1.1/24	Disable

⚠ **Note:**

NetDefendOS only allows Web GUI access from LAN port by default for security consideration. Please refer to user manual for more detail about how to change this configuration.

Connecting the DFL-260 **3**

3.1 Connecting Firewall to Your Network

A. First, connect the power cord to the receptor on the back panel of the DFL-260 and then plug the other end of the power cord to a wall outlet or power strip. After the power LED turns on, you need to wait 1-2 minutes for the DFL-260 to boot up completely.

B. Connect an Ethernet cable from the DFL-260 to your Cable/DSL modem. If the Cable/DSL modem is powered on, wait for the WAN LED on the DFL-260 to light up to show a proper connection. Otherwise, turn off your Cable/DSL modem, connect the Ethernet cable from the DFL-260 to your Cable/DSL modem, and turn on the Cable/DSL modem. Some Cable/DSL modems may not have an on/off switch and will require you to unplug the power adapter.

⚠ **Note:**
The default management IP address of the DFL-260 is 192.168.1.1. If you have are using a router that uses DHCP, there may be a conflict if the router uses the same IP address as the DFL-260. If this is the case, either disconnect the DFL-260 from the router and change the management IP address of the DFL-260, or change the DHCP settings on your router.

C. Insert an Ethernet cable to the LAN1 port on the rear panel of the DFL-260 and connect it to a port on your network hub or switch. The LAN port LED light on the DFL-260 will illuminate to indicate proper connection

D. Connecting the computer that you will use to configure the DFL-260 to the network hub or switch.

Configure DFL-260

4

4.1 Configure Your Computer's IP Address

Make sure that the network adapter in your computer is configured to use a static IP address with 192.168.1.1 as default gateway and 255.255.255.0 as netmask. Instructions on how to configure the network adapter can be found in the appendix.

When you have completed the steps in this *Quick Installation Guide,* your connected network should look similar to this:
4.2 Using the Setup Wizard

The DFL-260 provides Web based configuration. You can configure your DFL-260 through Internet Explorer 6 and later or Firefox 1.0 and later browser in MS Windows, Macintosh or UNIX based platforms.

Activate your browser, and ensure your built-in Pop-Up Blocker has been disabled, so that the Pop-Up Blocker will not block the Startup Wizard while you initiate the NetDefend Firewall for the first time.

Additionally, in order to reduce the impact of Pop-Up Blocker, a user-friendly mechanism has beem implemented in NetDefend Firewalls. A "Startup Wizard" button is shown on the toolbar since firmware v2.20. This button is available on the WebGUI while the appliance is initiated with Configuration Version 1. Once you complete configuration and save/activate the setting, the Startup Wizard button will be removed automatically from the toolbar while you login WebGUI next time.

Now, let's start on WebGUI login, type the IP address of the DFL-260, e.g. https://192.168.1.1, in the Location (for Netscape) or Address (for IE) field and press "Enter".

Open your Web browser and type **https://192.168.1.1 /** into the URL address box. Then press the Enter or Return key.

File	Edit	View	Favorites	Tools	Hel

Back

Address   https://192.168.1.1/
⚠ Note:

DFL-260 allows either HTTP or a secure HTTPS connection from any management host. However, for security reasons, by default only a secure HTTPS connection is allowed.

Log on to the DFL-260 web interface.

To start using the DFL-260 web interface you need to log on using the default username and password.

Type the default Username/Password

Username: admin
Pasword: admin
and click Login

Authentication Required

Please enter your username and password.

Username:
Password:
Language: English

Login

Optimized for Internet Explorer 6 (and later), Firefox and Netscape 8

Step1 - Welcome to the DFL-260 setup wizard!

This wizard will guide you through the setup of your DFL-260

Click **Next**

http://192.168.1.1/ModalFrame.htm?Page=WizardSetup
Step2 - Set up firewall administrator password

First **Enter** the username that you want to use for the admin account.

**Enter** the password that you want to use for the admin account.

Click **Next**

http://192.168.1.1/ModalFrame.htm?Page=WizardSetup
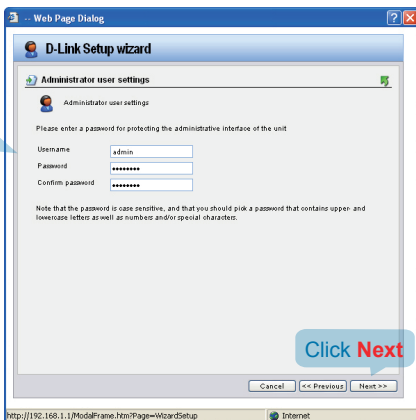

Step 3 - Set up time and date

Click Set time and date button for setting device

Click **Next**

Select the appropriate date Enter the appropriate time

Click **OK**

Step 4 - Set up timezone

Select the appropriate timezone.
Enter the appropriate dayligt saving time settings.
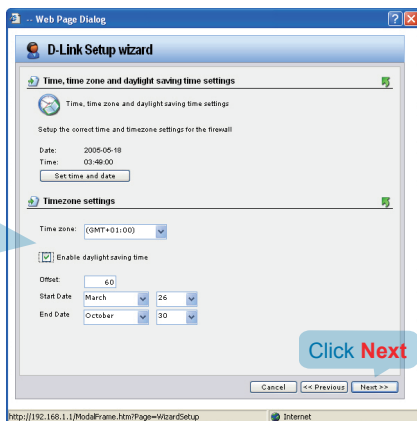

Click **Next**

Step 5 - Select WAN interface

Select the WAN interface that you want to use.
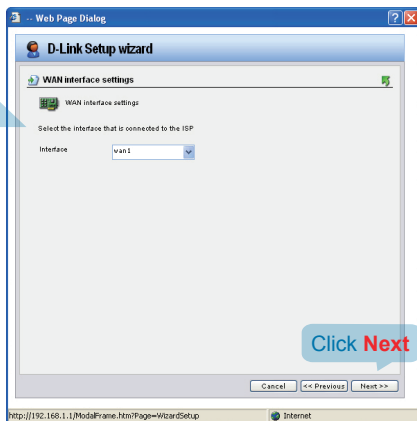

Click **Next**

Step 6 - Configure WAN interface

Select the appropriate configuration for the WAN interface, Click **Next** and continue to step 7.1 further down.
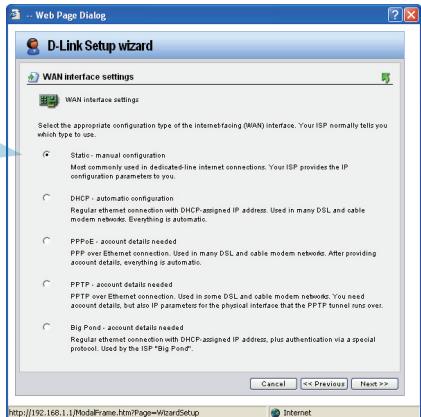

⚠️ **Note:**

If you are unsure of which setting to select, please contact your Internet Service Provider.
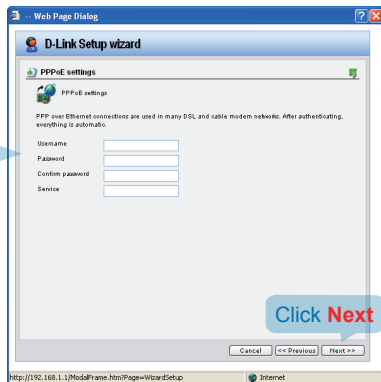

Step 7.1 - WAN Interface Type is Static IP

If you selected Static IP you have to fill out the IP address information provided to you by your ISP. You will need to complete all the required fields except for Secondary DNS Server.

Click **Next**
Step 7.2 - WAN Interface Type is PPPoE

If you selected PPPoE (Point-to-Point Protocol over Ethernet) you will have to fill out the user name and password provided to you by your ISP. The PPPoE Service Name field should be left blank unless your ISP informs you otherwise.

Step 7.3 - WAN Interface Type is PPTP

Enter Username, Password and the PPTP Server IP address provided by your ISP.

**DHCP:** If your ISProvider is using DHCP you should select the DHCP radio button.

Static IP: If your Internet Service Provider is using Static IP you should select the Static IP radio button and enter IP Address, choose a Subnet Mask and enter the Gateway IP address.

Step 7.4 - WAN Interface Type is Big Pond

If you selected Big Pond you will have to fill out the user name and password provided to you by your ISP.
Click **Next** and continue to step 8.

Click **Next**
Step 8 - Set up built-in DHCP server

If you want to use the built-in DHCP Server in the DFL-260, choose **Enable DHCP Server** in this screen. You then need to specify a range of IP addresses to hand out to the DHCP clients. This range is entered in the format **"Start IP - Stop IP"** i.e. 192.168.0.100 - 192.168.0.200. If you don't want to use the built-in DHCP Server or configure it later, choose Disable DHCP Server.
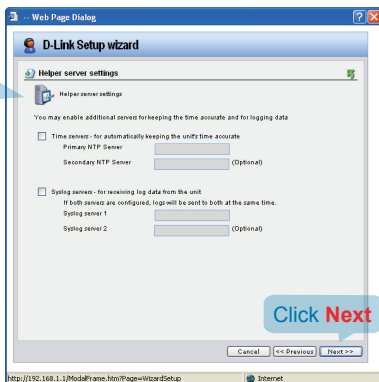

Click **Next**
Step 9 - Configure helper servers

NTP Servers
If enabled, specify which NTP Servers that should be used to syncronize the firewall time

**Syslog Servers**
If enabled, specify where the firewall should log, you can specify up to two Syslog recievers

Click **Next**

Step10 - Setup Wizard Complete

Click **Activate** to complete your configuration.

Appendix

To connect to the DFL-260 Network Security UTM Firewall, make sure the network adapter in your computer is configured properly. Here is how to configure the network adapter manually to the correct IP-address.

5.1 How to configure Static IP Manually on Microsoft Windows XP

Go to **Start** > **right click** on **My Network Places** > select **Properties** > **Right-click** on the **Network Connection** of the Ethernet adapter connecting to the DFL-260 and select Properties.
Click Internet Protocol (TCP/IP)

Click Properties
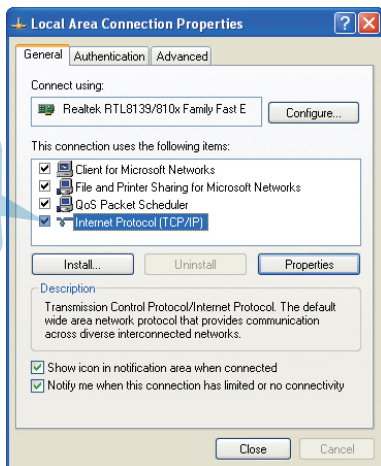

Select Use the following IP address
Set IP address to 192.168.1.30,
Subnet mask to 255.255.255.0
and Default gateway to 192.168.1.1
**Click OK**

⚠ **Note:**

Except for 192.168.1.1, you could set your PC with any IP addresses that same as the 192.168.1.0/ 255.255.255.0 subnet.

# 5.2 How to Configure Static IP Manually on Apple Mac OS X

Go to the **Apple Menu**
Click on **Network**
and **Select System Preferences**
Click on Network

Select Built-in Ethernet in the show pull down menu
Select Manually in the Configure pull down menu

Set IP Address to 192.168.1.30, Subnet Mask to 255.255.255.0 and Router to 192.168.1.1.
Click on Apply Now

FCC Warning

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with this manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

CE Mark Warning

This is a Class A product. In a domestic environment, this product may cause radio interference in which case the user may be required to take adequate measures.

Warnung!

Dies ist ein Produkt der Klasse A. Im Wohnbereich kann dieses Produkt Funkstoerungen verursachen. In diesem Fall kann vom Benutzer verlangt werden, angemessene Massnahmen zu ergreifen.

Precaución!

Este es un producto de Clase A. En un entorno doméstico, puede causar interferencias de radio, en cuyo case, puede requerirse al usuario para que adopte las medidas adecuadas.

Attention!

Ceci est un produit de classe A. Dans un environnement domestique, ce produit pourrait causer des interférences radio, auquel cas l`utilisateur devrait prendre les mesures adéquates.

Attenzione!

Il presente prodotto appartiene alla classe A. Se utilizzato in ambiente domestico il prodotto può causare interferenze radio, nel cui caso è possibile che l`utente debba assumere provvedimenti adeguati.

VCCI Warning

この装置は、クラスA情報技術装置です。この装置を家庭環境で使用すると電波妨害を引き起こすことがあります。この場合には使用者が適切な対策を講ずるよう要求されることがあります。

BSMI Warning

警告使用表

這是甲類的資訊產品，在居住的環境中使用時，可能會造成射頻干擾，在這種情況下使用者會被要求採取某些適當的對策。
