Package Contents

- DWP-1010 5G/LTE Outdoor CPE
- PoE Injector (53Vdc, 0.6A Power Supply)
- AC Power Cable
- Pole Mount Kit - Stainless Clamp x 2
- Wall Mount Kit - Screw Anchor (M6x25mm) / Screws (M3.5 X16mm)
- RJ45 Cable (10m) for connection between the modem and the PoE Injector
- Warranty Card
- GPL Sheet

If any of the above items are missing, please contact your reseller.

System Requirements

- Computer with Windows, Macintosh, or Linux-based operating system with an installed Ethernet adapter.
- Java-enabled browser such as Internet Explorer 11+, Chrome 94 or higher, Firefox 93 or higher, Safari 15 or higher, or Edge 94 or higher.
- An active 5G/LTE service plan from a compatible carrier*.

*Subject to services and service terms of your carrier

Introduction

The D-Link DWP-1010 5G/LTE Outdoor CPE is an easy-to-deploy, high performance 5G LTE router. It features a Gigabit Ethernet port (PoE) and 5G LTE mobile broadband for maximum reliability and mobility for intense Internet applications in remote areas in lieu of cable and DSL connections. Rugged design and flexible deployment options make the DWP-1010 ideal for both large-scale and last-mile deployments.

Establish your high-speed 5G LTE mobile service with the DWP-1010 by installing a SIM card and enjoy fast downlink speeds of up to 3.4Gbps¹ and uplink speeds up to 900Mbps¹, giving the speed you need for fast, responsive triple-play services.

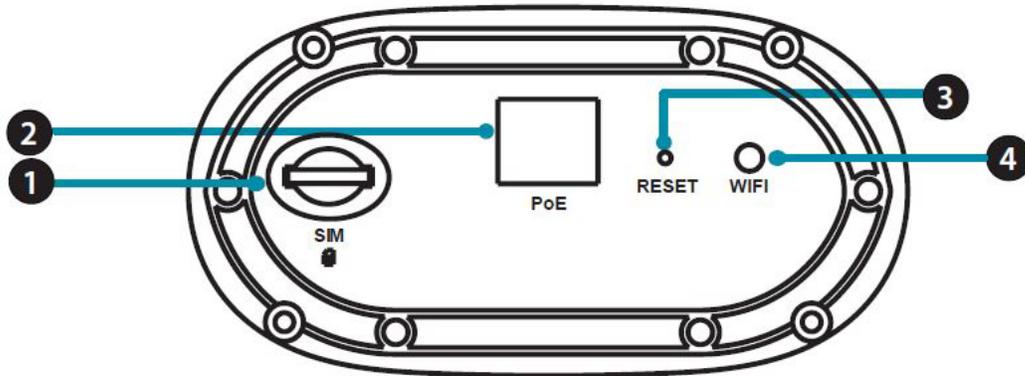

The industrial-grade casing means that the DWP-1010 provides reliable high-speed connectivity in extreme conditions. Compliant with IP65 enclosure rating, the weather resistant housing helps protect it from dirt and rain. Pole mounting and sturdy brackets allow the device to be installed virtually anywhere for optimal connectivity, giving you the freedom to install it right where signal is strongest.

The DWP-1010 features built-in 4kV surge protection on its PoE Ethernet port and requires no external surge protection devices. The enclosure is also able to resist direct static discharges of up to 4 kV. This effectively protects the device against sudden electrical surges caused by events such as lightning strikes or unstable electrical current. This protection significantly reduces the chance of equipment being damaged by electrical surges, and effectively lowers maintenance costs by minimizing the need for expensive equipment repairs or replacement.

¹ Data rates are theoretical. Data transfer rate depends on network capacity, signal strength, and environmental factors.

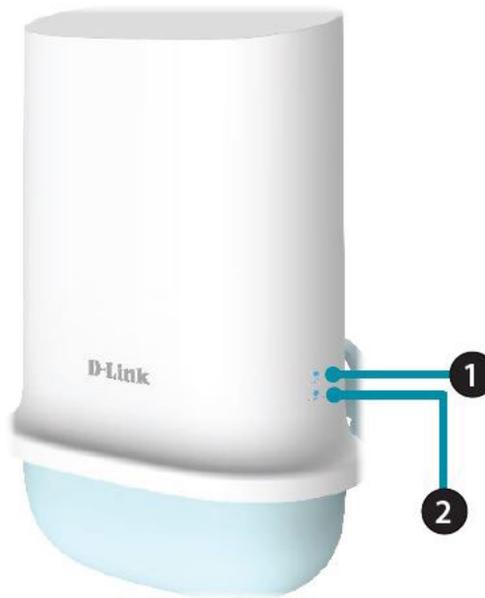

Hardware Overview

Bottom View

| | | |
|---|------------------------|---|
| 1 | SIM Card Socket | Insert a 5G/LTE capable SIM card into the slot to activate 5G/LTE service. |
| 2 | PoE | PoE (power over Ethernet) connector. |
| 3 | Reset | Press for 10 seconds to reset the device to factory default settings. The Signal LED should be on and off during reset. |
| 4 | Wi-Fi Button | Click to enable Wi-Fi. (For installation purposes only) |

Side Panel

| 1 | Signal LED | Indicates the signal strength of the device. | Flashing red: No signal Solid red: Moderate signal Flashing blue: Good signal Solid blue: Excellent signal |
| 2 | 5G/4G/3G | Indicates the connection type. | Off: No signal Solid Green: LTE/3G Solid Blue: 5G |

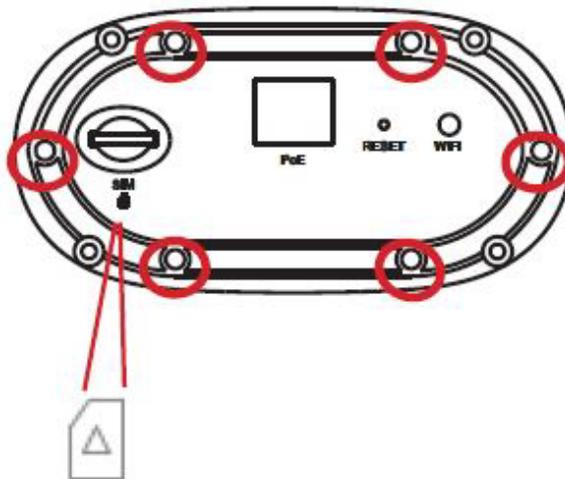

Installation

Connecting the SIM Card

1. Remove the four screws on the bottom of DWP-1010 to remove the protective base.

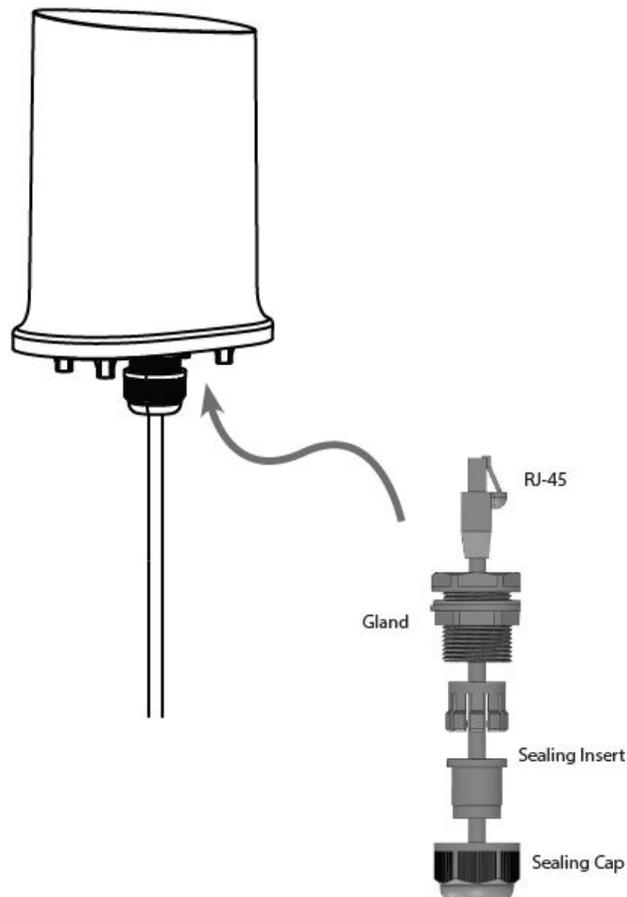

2. Remove the six screws around the water-resistant component. Insert the SIM card according to the orientation label on the device.

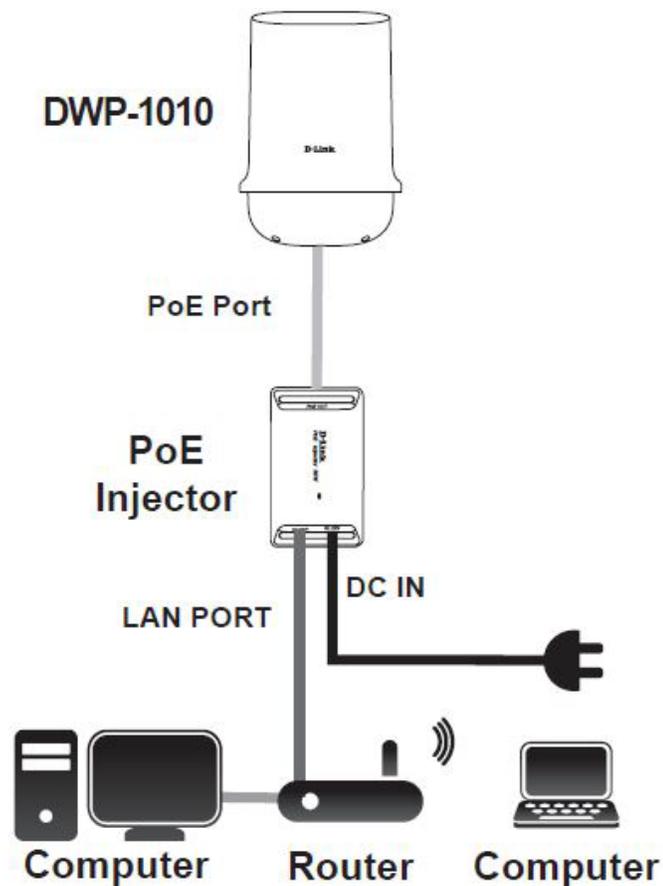

Connecting an Ethernet Cable

1. Separate the sealing cap and sealing insert of the waterproof connector.
2. Insert the RJ-45 connector to the PoE port by threading an Ethernet cable through gland > sealing insert > sealing cap.
3. Place the water-resistant component back to DWP-1010.
4. Attach the sealing insert to the gland and make sure the assembly is fixed on the bottom of the water-resistant component.
5. Attach the sealing cap and tighten until snug.
6. Secure the water-resistant component with six (M2.5x6 mm) screws. Position it as the arrow indicated. (The arrow is located on the bottom.)
7. Thread the RJ-45 cable through the protective base.
8. Reinstall the protective base with the four (M3x4 mm) screws. (Skip this step if you're using a wall mount)

Connecting to Your Network

1. Connect the Ethernet cable from the DWP-1010 to the “PoE” port of the PoE Injector.
2. Connect an Ethernet cable from a router/switch to the “LAN” port of the PoE Injector.
3. Attach the power cable to the power socket of the PoE Injector and plug the other end of the cable into an electrical outlet.

Maintenance Notice

Warning

Attention

- Only use the power cable that comes with the package.
- Over voltage is dangerous and may damage the product.
- Do not open or repair the case yourself. If the product is too hot, turn off the power immediately and have it repaired at a qualified service center.
- The 5G/LTE Outdoor CPE shall not be installed in the same area with PoE injector during the environment temperature is above 50°C.

Hot Surface Caution

CAUTION: The surface temperature of the enclosure can be very high. Especially after operating for an extended period of time, or when installed in an enclosed space without air circulation, or in a high ambient temperature location.

DO NOT touch the surface while servicing.

Configuration

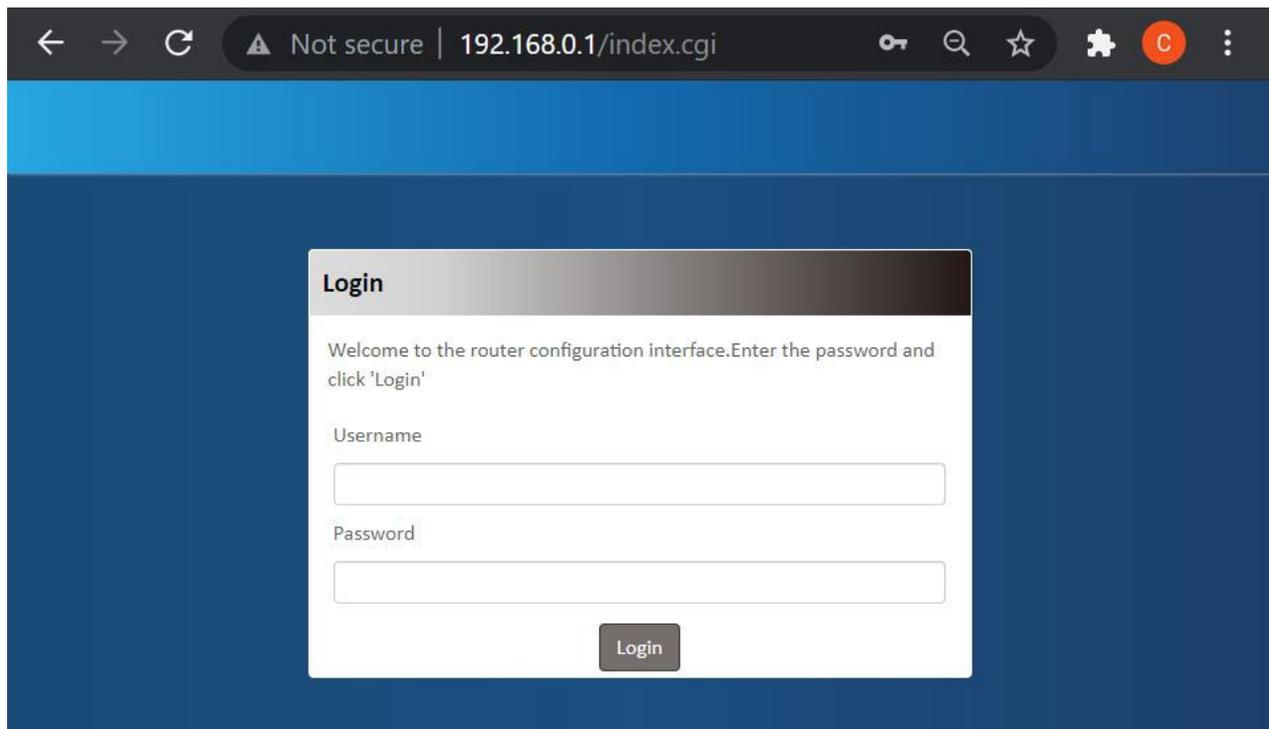

Getting Started

To access the configuration utility, open a web browser such as Internet Explorer and enter the address of the router (**192.168.100.1** by default).

To log in to the configuration utility, enter the default username **admin** and the default 8-digit password printed on the Quick Installation Guide.

Notes:

1. If you get a **Page Cannot be Displayed** error, please refer to the Troubleshooting section for assistance.
2. If you failed the login attempt for 3 times, you will be temporarily locked before log in fields are available again.

If this is the first time logging into the device, the system will prompt you to set a new password. Note that the password must be at least 10 characters and contain a mix of letters and numbers.

If you lose or forget the admin password, the **ONLY** remedy is to recover the device to its factory default settings by long pressing the Reset button. The reset procedure will erase the entire device configuration.

Change Password

For security consideration, you are being asked to change the password, while the first time login to the device.

Enter the new password below.

(NOTE: The password must be at least 10 characters long, and must contain at least 1 English letter and 1 number. The password cannot be the same as the login account.)

New Password

New Password Confirmation

Save

Once you have successfully logged in, you will see the **Home** page. On this page, you can view information about your LAN network connection, cellular connection, and signal information.

Select a configuration category from the menu panel and click the corresponding function tabs to go to the appropriate configuration page.

On each page, enter the desired settings and click **Apply** when you are done with your changes.

The screenshot displays the configuration interface for the D-Link WDP-1010. On the left is a navigation menu with options: Status, Cellular, Setup, Administrator, and Logout. The main content area is titled 'Network' and has sub-tabs for 'Network', 'Modem', and 'Signal'. The 'Network' tab is active, showing two sections: 'IPv4 Network' and 'IPv6 Network'. The 'IPv4 Network' section includes fields for Mode (set to Modem), Link Status (Disconnected), IP Address, Netmask, and Gateway. The 'IPv6 Network' section includes fields for Global IP Address and Link-Local IP Address.

Status Network

On this page you can view your router's operating mode and related LAN network configuration. If you are not sure which settings to use, please contact your Internet Service Provider (ISP). Note that the DWP-1010 requires a SIM card and active cellular internet service to connect to the Internet.

| IPv4 Network | |
|--------------------|--|
| Item | Description |
| Mode | Shows the operating mode of the router, i.e. NAT or modem. |
| Link Status | Shows whether the mobile Internet connection is connected or disconnected. |
| IP Address | Displays the assigned IP address for your Internet connection. |
| Netmask | Displays the subnet mask for the above IP assignment. Shows cellular signal strength as a percentage. |
| Gateway | Displays the default gateway for the current connection. |

| IPv6 Network | |
|------------------------------|---|
| Item | Description |
| Global IP Address | Displays the public IPv6 address |
| Link-Local IP Address | Displays the IPv6 address that can be used only for communication with locally connected devices. |

Modem

On this page you can view your router's operating mode and related LAN network configuration. If you are not sure which settings to use, please contact your Internet Service Provider (ISP). Note that the DWP-1010 requires a SIM card and active cellular internet service to connect to the Internet.

| Advanced Information | <p>The status of the SIM card, i.e. ready or empty.</p> <p>The Advanced information displays the following additional information: MCC: The mobile country code (MCC), which is the first 3 digits of the International Mobile Subscriber Identity (IMSI). MNC: The mobile network code (MNC), which is the 2-digit or the 3-digit code following the MCC. Roaming: shows whether data roaming is allowed when the router is used outside of your mobile service's coverage. Cell ID: The cell identifier represents each base transceiver station. Band: The radio frequency used. LAC: The location area code (LAC) represents the location of base transceiver stations in 3G. TAC: The tracking area code (TAC) represents the location of base transceiver stations in LTE and 5G network. ISMI: The SIM/USIM/UICC card has a unique number for identifying mobile user called an International Mobile Subscriber Identity (IMSI). It is a 15-digit number composed of the mobile country code (MCC), mobile network code (MNC), and mobile network code (MNC).</p> |

Signal

On this page, you can view your mobile signal information. If you are not sure which settings to use, please contact your Internet Service Provider (ISP). Note that the DWP-1010 requires a SIM card and active cellular internet service to connect to the Internet.

| Signal | |

| Item | Description |
| Service Type | The type of mobile service, i.e. 3G, LTE or 5G. |
| Operator | The name of the mobile service provider. |
| Advanced Information | <p>The Advanced information displays the following additional information: RSSI: The Received Signal Strength Indicator (RSSI) indicates the estimated power level of signal in 3G network. RSRP: The Reference Signal Received Power (RSRP) indicates the estimated power level of signal in LTE and 5G network. RSRQ: The Reference Signal Received Quality (RSRQ) indicates the signal quality of LTE and 5G network. SINR: The signal-to-interference-plus-noise ratio (SINR) indicates the signal quality with respect to interference in LTE and 5G network. RSCP: The Received Signal code power (RSCP) indicates the estimates power level of signal on a specific communication channel. ECIO: The Energy per chip to Interference power ratio is a measurement of signal quality in terms of signal to noise ratio in 3G network.</p> |

Setup

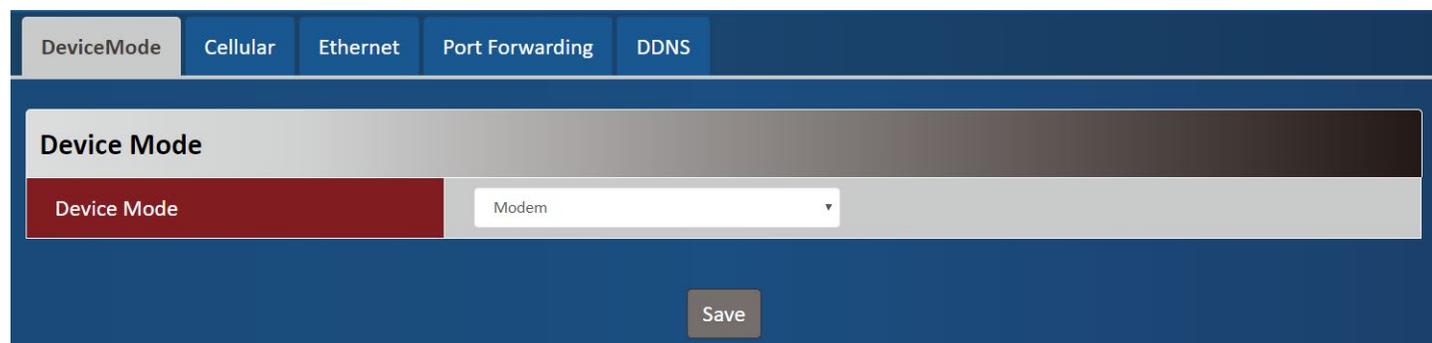

The DWP-1010 connects via Gigabit Ethernet interface for 5G/LTE network connection. DWP-1010 also functions as a NAT router to provide more flexible network applications.
