

WIRELESS N 150 ROUTER

TOTAL COMPATIBILITY Works with any Wi-Fi certified device,

giving you peace of mind and performance

TOTAL SECURITY

Complete set of security features including an SPI firewall and WPA2 wireless encryption to protect your network against intruders

EASY CONFIGURATION

Use the D-Link Setup Wizard and Wi-Fi Protected Setup™ (WPS) for easy, automatic connection to a wireless network

WIRELESS N 150 ROUTER

DIR-600

HIGH-SPEED WIRELESS NETWORKING

Create a high-speed wireless network for your home using the D-Link Wireless N 150 Router. Connect the DIR-600 to a broadband modem and wirelessly share your high-speed Internet connection and enjoy surfing the web, checking e-mail, and chatting with family and friends online. The router uses Wireless N 150 technology, which offers increased speed and range over the 802.11g/b standard¹. It features NAT (Network Address Translation), allowing multiple users to connect to the Internet by sharing a single IP address.

SECURE YOUR WIRELESS NETWORK

The DIR-600 includes a built-in firewall that safeguards your network from harmful attacks. It minimizes the threats of hackers and prevents intruders from entering your network. Additional security features include a Stateful Packet Inspection (SPI) firewall that analyzes network traffic, and a website filter that prevents users from viewing inappropriate content. The DIR-600 also supports WEP, WPA, and WPA2 encryption to keep your network traffic secure.

COMPATIBILITY ASSURANCE

The DIR-600 provides a high speed connection to other Wireless N 150 or 802.11n devices and is backward compatible with 802.11b/g, ensuring compatibility with a wide range of wireless devices. The DIR-600 also includes an integrated 4-port 10/100BASE-TX Ethernet switch that gives you the flexibility to connect wired computers to the network.

EASY TO INSTALL AND USE

With D-Link's Setup Wizard, you can set up your network in minutes. The wizard will guide you through an easy to follow process to install your new hardware, connect to your network and add new devices. It configures your Internet Service Provider (ISP) settings to quickly establish broadband Internet connectivity. In addition, the DIR-600 is Wi-Fi Protected SetupTM (WPS) certified, making it even easier to configure your wireless network and enable security with the push of a button.

D-Link[®]

WHAT THIS PRODUCT DOES

Share your broadband Internet connection with multiple computers in your house by simply connecting the DIR-600 to your cable or DSL modem. Once connected, you can create your own personal wireless home network to connect to the Internet, or share documents, music, and photos.

EASY INSTALLATION

Set up your new D-Link networking hardware in minutes using our new Setup Wizard. The wizard will guide you through an easy to follow process to install your new hardware and connect to your network.

ADVANCED WIRELESS FUNCTIONS

The D-Link Wireless N 150 Router includes everything you need to get a wireless network up and running:

- Wireless N 150 and IEEE 802.11b/g compatible
- WEP, WPA (TKIP) and WPA2 (AES) support
- UPnP[™] support
- WPS™

WIRELESS ANTENNA Connects to wireless computers and devices 10/100BASE-TX ETHERNET LAN PORTS Connect to Ethernet-enabled computers and devices 10/100BASE-TX ETHERNET WAN PORT Connects to DSL/cable modem POWER SOCKET Connects to power adapter RESET BUTTON Resets to factory defaults

TECHNICAL SPECIFICATIONS

POWER INPUT

= 5 V DC/1 A through external power adapter

DIAGNOSTIC LEDs

- Power
- Internet
- = WLAN
- = LAN

DIMENSIONS (L x W x H)

113.2 x 147.5 x 31.5 mm
(4 4 x 5 8 x 1 2 inches)

WEIGHT

246 grams (0.5 lb)

OPERATING TEMPERATURE

■ 0 to 40 °C (32 to 104 °F)

STORAGE TEMPERATURE

-20 to 65 °C (-4 to 149 °F)

OPERATING HUMIDITY

= 10% to 95% non-condensing

STORAGE HUMIDITY

= 5% to 95% non-condensing

CERTIFICATIONS

- = FCC
- = CE
- C-Tick
- NCC
- Wi-Fi Certified
- Compatible with Windows 7

¹ Actual data throughput will vary. Network conditions and environmental factors, including volume of network traffic, building materials and construction, and network overhead lower actual data throughput rate and adversely affect the range.
