Choose the smart way to extend your home network

The D-Link PowerLine
AV2 1000 HD Gigabit Starter Kit

D-Link ®

Home is where the **SMART** is

Get Wi-Fi all around the house

There's nothing more annoying than having parts of your home where your Wi-Fi won't reach. Well, those days are gone thanks to our choice of PowerLine Internet Plugs and Wireless Extender kits. Each kit has everything you need to quickly, easily and securely start enjoying the internet in every room.

Get the benefit of…

✓ Everything you need to extend your Wi-Fi around the home

✓ Fast network performance of up to a Gigabit (1000 Mbps)

✓ Plug and play – no IT or networking knowhow needed

✓ Secure network sharing – prevent unwanted connections at the push of a button

✓ Compact design that fits discreetly around the home

✓ Automatic power saving mode to save you power and money

How do I get them to work?

All our kits are quick and simple to use. Just plug in one adapter into any electrical socket and connect it to your router, then plug the other adapter into the room you want the signal to go. It's that easy!

With the Powerline Internet Plug or Wireless Extender Kits every power outlet in your home is a potential network connection for watching smart TVs, playing on games consoles, using your computer and more!

Do I need a Powerline Internet Plug or Wireless Extender Kit?

Both the Powerline Internet Plug and Wireless Extender Kit both send a Wi-Fi signal to any room in your home. The difference is how you connect your device in that room. With the Internet Plug, you connect it using an Ethernet cable, while with the Wireless Extender you can connect using your device's Wi-Fi.
