Configuration	Save changes and reboot system?
Maintenance	
C Summary	To make the settings you changed take effect, you should save the changes and reboot the system.
	Do you want to save the settings and reboot now?
	Save changes and reboot system now
	Continue and do 'Save Changes' later
	OK

After the system has rebooted login to the web configuration again. In the PPP information an IP address and default gateway appear, the connection status should say connected.

Your router is configured.
