The DSL-2888A Dual Band Wireless AC1600 Gigabit ADSL2+/ VDSL2 Modem Router is everything you need for high-speed Internet access for your entire home. It combines an ADSL2+/VDSL2 modem and high-end wireless router together to create a single, easy to use device that creates and shares an Internet connection for all your devices.

**Fast and Reliable Home Network**

The D-Link DSL-2888A Dual Band Wireless AC1600 Gigabit ADSL2+/ VDSL2 Modem Router creates a blazing fast home network that connects all of your devices to your broadband Internet connection. Concurrent dual-band 802.11ac brings you the future of high-bandwidth wireless connectivity, allowing you to stream HD video, make Internet voice calls, and surf the Internet from every corner of your home without interruption. Gigabit Ethernet ports provide high-speed wired connections for up to four PCs or other devices. It’s stylish, easy to use, and provides you with a reliable network for today and tomorrow.

**Multiple Failover Redundancy and Future Connectivity**

The D-Link DSL-2888A Dual Band Wireless AC1600 Gigabit ADSL2+/ VDSL2 Modem Router comes not only with a built-in high speed VDSL/ADSL modem, capable of up to 300 Mbps VDSL/24 Mbps ADSL speeds, but is also equipped with a Gigabit Ethernet WAN port and two USB 2.0 ports which support 3G/4G mobile broadband adapters. This means that if your primary connection method should fail, the DSL-2888A will automatically fall back to your pre-defined backup connection.

**File Sharing Right at Your Fingertips**

The DSL-2888A lets you connect a USB storage device and instantly share documents, movies, pictures, and music. You can put your music library on a USB drive and share it with your entire home. You can show photos on the living room TV while a family member watches a movie on their computer. You can stream media files to multiple devices without interruption, or save them to your device for offline playback. The intuitive interface lets anyone immediately connect to a variety of entertainment options stored on your own storage device.
Smooth Streaming with Wireless AC

The DSL-2888A uses the latest Wireless AC technology, which provides transfer rates of up to 1.6 Gbps² (1300 AC + 300 N). Featuring a 3x3 MU-MIMO antenna configuration, the router operates on both the 2.4 GHz and 5 GHz wireless bands at the same time using concurrent dual-band technology and three external antennas. This allows you to browse the web, chat and e-mail using the 2.4 GHz band, while simultaneously streaming digital media, playing online games, or making Internet voice calls on the 5 GHz band.

Easy to Set Up

Setting up the DSL-2888A is easy with the D-Link easy setup wizard. Simply open the setup utility and follow a few easy steps to get your home network up and running. You can also set up a WPA2 encrypted network with the touch of a button using Wi-Fi Protected Setup (WPS). Simply press the respective WPS buttons on each device to instantly establish an encrypted connection to a new device. Your network will be encrypted with WPA/WPA2 wireless encryption and employ built-in dual active firewalls (SPI and NAT).

Designed for Optimal Wireless Coverage

The DSL-2888A’s antennas have been carefully designed to ensure that you will get little to no dead space in any environment. The high-powered amplifier sends the signal into the farthest corners of your home. Furthermore, the Dual Band Wireless AC1600 Gigabit ADSL2+/VDSL2 Modem Router’s multiple external antennas improve wireless reception by bringing signals to where they are most needed to achieve the best possible performance.

Smooth Transmissions

The DSL-2888A Dual Band Wireless AC1600 Gigabit ADSL2+/VDSL2 Modem Router employs QoS priority queues and packet prioritization minimize traffic congestion and deliver smooth VoIP and streaming media, providing you with the best possible Internet experience.
## Technical Specifications

### General

| Device Interfaces | • One RJ-11 xDSL port  
|                   | • 802.11 b/g/n/ac Wireless LAN  
|                   | • One 10/100/1000 Gigabit WAN port  
|                   | • Four 10/100/1000 Gigabit LAN ports
|                   | • Two USB 2.0 ports |
| Antenna Type      | • Three external removable MIMO dual band antennas |
| Data Signal Rate  | • 2.4 GHz  
|                   | • Up to 300 Mbps
|                   | • 5 GHz  
|                   | • Up to 1,600 Mbps |
| Standards         | • IEEE 802.11ac  
|                   | • IEEE 802.11n  
|                   | • IEEE 802.11g  
|                   | • IEEE 802.11b  
|                   | • IEEE 802.3  
|                   | • IEEE 802.3u  
|                   | • IEEE 802.3ab  
|                   | • IEEE 802.3az  
|                   | • IEEE 802.3x  
| Minimum System Requirements | • Windows 10/8.1/8/7/Vista/XP SP3 or Mac OS X 10.4 or higher  
|                   | • Microsoft Internet Explorer 10 or higher, Edge 20.10 or higher, Firefox 11 or higher, Chrome 17 or higher, Safari 5 or higher, or other Java-enabled browser  
|                   | • Ethernet or Wireless network interface  
|                   | • Subscription with an Internet Service Provider (ISP) |

### Functionality

| Security         | • WPA & WPA2 (Wi-Fi Protected Access)  
|                  | • Wi-Fi Protected Setup (WPS) - PIN/PBC |
| Advanced Features| • Multi-language web setup wizard  
|                  | • UPnP support  
|                  | • Multiple PVC (up to 8)  
|                  | • Dual active firewall  
|                  | • VPN pass-through/multi-session PPTP/L2TP/IPSec  
|                  | • 802.1p QoS |

### Physical

| Dimensions       | • 230 x 155 x 37 mm (9.05 x 6.10 x 1.45 inches) |
| Weight           | • 523 grams (1.15 pounds) |
| Power            | • Input: 100 – 240 V  
|                  | • Output: 12 V / 2A |
| Temperature      | • Operating: 0 to 45 °C (32 to 113 °F)  
|                  | • Storage: -20 to 70 °C (-4 to 158 °F) |
| Humidity         | • 10 % to 95 % non-condensing |
| Certifications   | • CE  
|                  | • FCC  
|                  | • LVD  
|                  | • RCM |

1. Maximum wireless signal rate derived from IEEE Standard 802.11ac, 802.11n, 802.11g, and 802.11b specifications. Actual data throughput will vary. Network conditions and environmental factors, including volume of network traffic, building materials and construction, and network overhead, lower actual data throughput rate. Environmental factors will adversely affect wireless signal range. Wireless range and speed rates are D-Link relative performance measurements based on the wireless range and speed rates of a standard Wireless G product from D-Link. Maximum throughput based on D-Link 802.11ac devices.
