The DWR-932C 4G/LTE Mobile Router is a 4G LTE Cat4 high-speed broadband wireless WAN (WWAN) to Wi-Fi mobile hotspot. The DWR-932C uses a 4G Internet connection to give you an easy-to-set-up Wi-Fi network anywhere you need one. Instead of limiting your mobile Internet connection to a single device through a USB dongle, the DWR-932C allows you to create a Wi-Fi hotspot to share your connection with multiple Wi-Fi devices. The convenient size means you can share your connection anywhere; use it in a cafe to send e-mail while your friend reads the news, or at the airport so you and your coworkers can work while waiting for your plane.

Connect Anywhere
Simply insert your data-enabled SIM card to set up your very own mobile Wi-Fi network. The DWR-932C is perfect for when you need to quickly set up an impromptu network; it’s ideal for business trips when you need to share an Internet connection with everybody during a meeting, or use it for travel, allowing you to provide all your travel companions with Internet access.

Security Features Help Protect Your Network
The DWR-932C 4G/LTE Mobile Router is easy-to-use and includes a host of security features. The built-in firewall helps your network resist intrusions over the Internet, while WPA encryption helps prevent unauthorized users from connecting to your network. Wi-Fi Protected Setup (WPS) allows you to quickly add new devices at the touch of a button, getting you connected in no time.

Flexible Usage
The DWR-932C 4G/LTE Mobile Router gives you instant connectivity, all in a powerful yet pocket-sized device. The rechargeable 2000 mAh Li-on battery allows you to stay connected for long periods of time. Plug-and-play with no complicated software to install, getting online with the DWR-932C 4G/LTE Mobile Router is quick, easy, and convenient.

1. Supported frequency band is dependent upon regional hardware version.
2. Data rates are theoretical. Data transfer rate depends on network capacity and signal strength.
