AN3U	N300 Wi-Fi 4 USB Adapter Quick Installation Guide

1. Maximum wireless signal rate derived from IEEE standard 802.11n/g/b specifications. Actual data throughput will vary. Network conditions and environmental factors, including volume of network traffic, building materials and construction, and network overhead, lower actual data throughput rate. Environmental factors may adversely affect wireless signal range.

2. Using USB 1.1 will affect device performance. USB2.0 port or higher recommended.
