

How to setup and to install?

How to setup and to install?

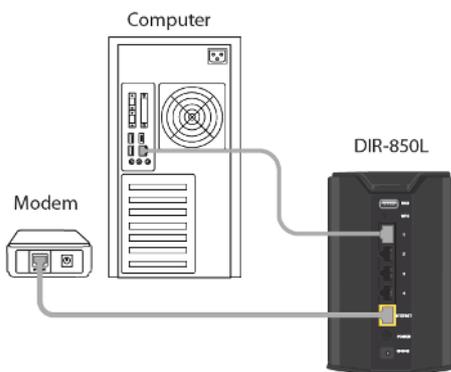

Step 1: Unplug the power to your cable/DSL Internet modem

Step 2: Connect an Ethernet cable from your computer to a LAN port (Port 1,2,3 or 4) on the DIR-850L

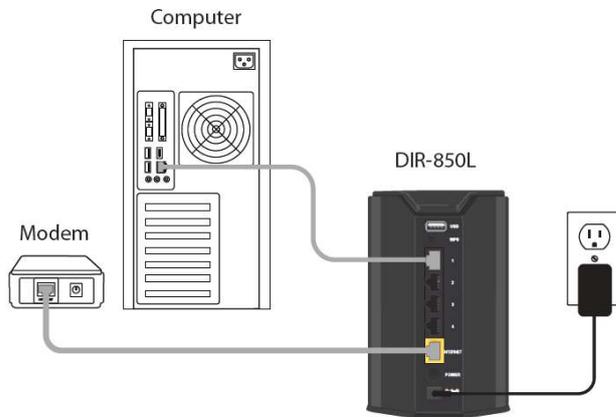

Step 3: Connect your cable/DSL modem to the Internet port on the DIR-850L

Step 4: Plug in the power for your cable or DSL broadband modem and wait for two minutes

Step 5: Power on both the DIR-850L and your Internet cable/DSL modem

How to setup and to install?

Step 6: Open your web browser and enter <http://dlinkrouter> or <http://dlinkrouter.local> or <http://192.168.0.1> into the address bar

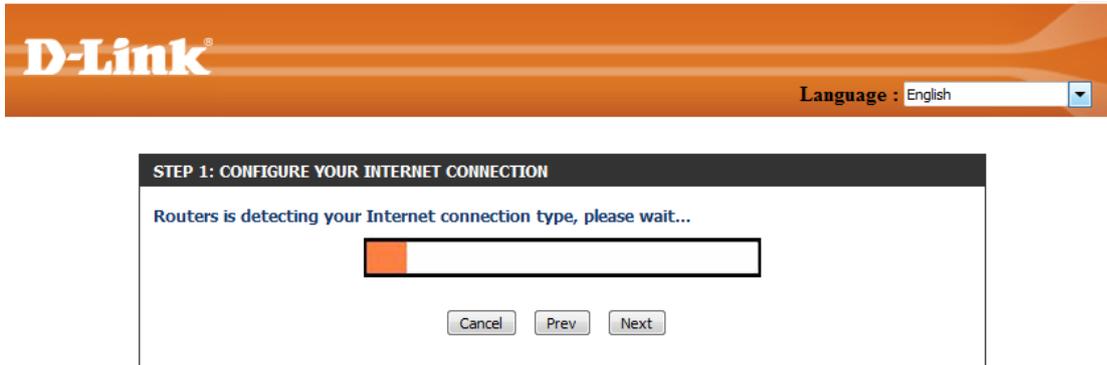

Step 7:

If this is your first time logging in to the router, the Setup Wizard will start automatically. This wizard is designed to guide you through a step-by-step process to configure your new D-Link router and connect to the Internet. Click Next to continue.

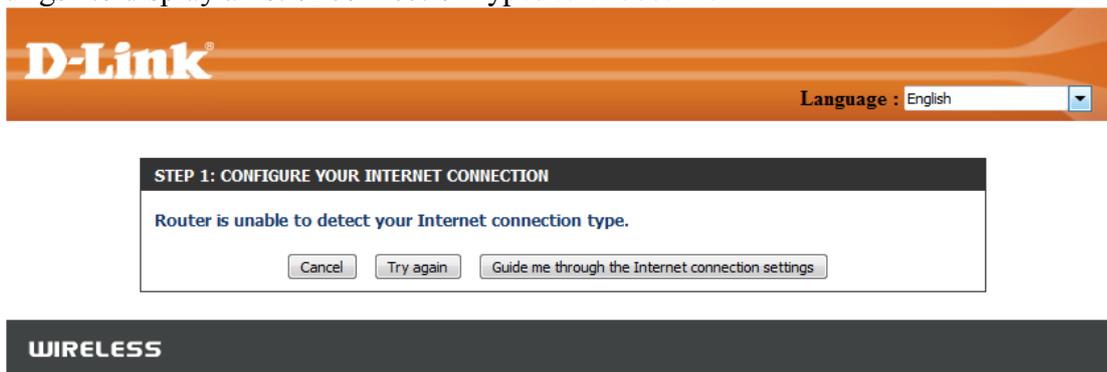

Please wait while your router detects your Internet connection type. After the router detects your Internet connection, you may need to enter information such as a username and password. To obtain these, you will need to speak to the company that provides your Internet, also known as an Internet Service Provider (ISP).

How to setup and to install?

If the router detects an Ethernet connection but does not detect the type of Internet connection you have, the below screen will appear. Click “Guide me through the Internet connection settings” to display a list of connection types to choose from.

Select your Internet Connection type: Dynamic or PPPoE

- **DHCP** – Select this if you have cable Internet service. You will likely not need to type in any extra information
- **PPPoE** – Select this if you have DSL Internet service. You will likely need to input some information to get Internet access
 - Username: Your Internet username (Provided by your Internet Service Provider)
 - Password: Your Internet password (Provided by your Internet Service Provider)

How to setup and to install?

D-Link

Language : English

STEP 1: CONFIGURE YOUR INTERNET CONNECTION

If your Internet Service Provider was not listed or you don't know who it is, please select the Internet connection type below:

- DHCP Connection (Dynamic IP Address)**
Choose this if your Internet connection automatically provides you with an IP Address. Most Cable Modems use this type of connection.
- Username / Password Connection (PPPoE)**
Choose this option if your Internet connection requires a username and password to get online. Most DSL modems use this type of connection.
- Username / Password Connection (PPTP)**
PPTP client.
- Username / Password Connection (L2TP)**
L2TP client.
- Static IP Address Connection**
Choose this option if your Internet Setup Provider provided you with IP Address information that has to be manually configured.

WIRELESS

For both the 2.4GHz and 5GHz wireless frequencies, create a name (SSID) for your Wi-Fi network. Each Wi-Fi network will also need a password of at least 8 characters. Your wireless clients will need to have this passphrase or key entered to be able to connect to your wireless network. Click Next to continue. (Password suggestion: please use a password that is easy for you to remember but obscure for others to guess. Strong passwords include letters and num-

bers in various positions.)

STEP 2: CONFIGURE YOUR WI-FI SECURITY

Give your Wi-Fi network a name and a password. (2.4GHz Band)

Wi-Fi Network Name (SSID) :
 (Using up to 32 characters)

Wi-Fi Password :
 (Between 8 and 63 characters)

Give your Wi-Fi network a name and a password. (5GHz Band)

Wi-Fi Network Name (SSID) :
 (Using up to 32 characters)

Wi-Fi Password :
 (Between 8 and 63 characters)

In order to secure your router, please create a password to access the router firmware. This should be different from the password to connect to the Wi-Fi network. Click Next to continue.

STEP 3: SET YOUR PASSWORD

By default, your new D-Link Router does not have a password configured for administrator access to the Web-based configuration pages. To secure your new networking device, please set and verify a password below, and enabling CAPTCHA Graphical Authentication provides added security protection to prevent unauthorized online users and hacker software from accessing your network settings.

Password :

Verify Password :

Enable Graphical Authentication :

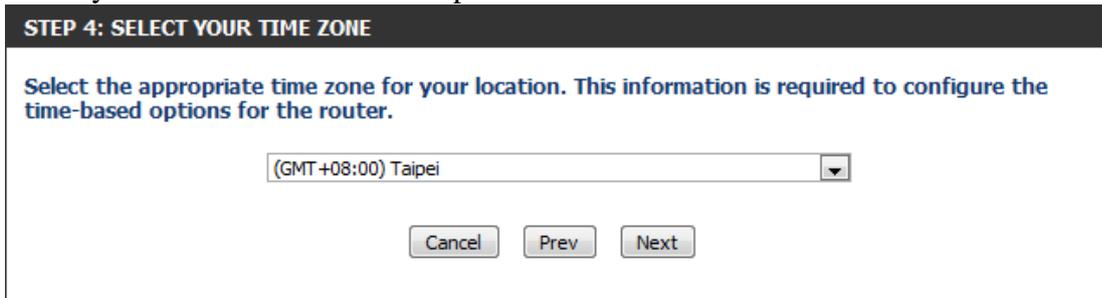

You can check the Enable Graphical Authentication box to enable CAPTCHA authentication for added security. CAPTCHA is demonstrated by the arrow in the login screen as below and

helps protect against automated attacks:

Select your time zone from the drop-down menu and click Next to continue.

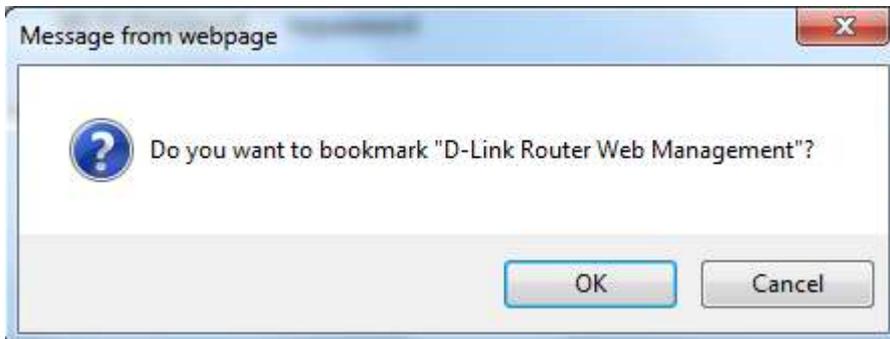

The Setup Complete window is followed by your Wi-Fi settings. Click **Next** and Connect to continue.

If you want to create a bookmark to the router management page, click OK. Click Cancel if you do not want to create a bookmark.

How to setup and to install?

If you clicked Yes, a window may appear (depending on what web browser you are using) to create a bookmark.

mydlink Cloud Services registration:

With mydlink Cloud Services you can remotely manage, control and monitor your home network from anywhere by using the mydlink Lite mobile app or mydlink web portal. Now, parents can view sites kids are visiting and what devices are connected to your network. And if you use the mydlink SharePort app, you can also access content on a USB drive connected to your router.

You may choose Next to register this device with mydlink for free. Or you may choose Skip to register later.

To get started with mydlink Cloud Services, you are required to have a mydlink account and need to register this router to the mydlink account. Select "Yes, I have a mydlink account" if you have previously registered a mydlink account; Select "No, I want to register and login with a new mydlink account" if you would like to create a new mydlink account.

How to setup and to install?

STEP 6: MYDLINK REGISTRATION

This device is mydlink-enabled, which allows you to remotely monitor and manage your network through the mydlink.com website, or through the mydlink mobile app. You will be able to check your network speeds, see who is connected, view device browsing history, and receive notifications about new users or intrusion attempts.

You can register this device with your existing mydlink account. If you do not have one, you can create one now.

Do you have mydlink account?

Yes, I have a mydlink account.

No, I want to register and login with a new mydlink account.

a) If you selected “Yes, I have a mydlink account,” please enter your existing mydlink account name and password. Then choose Login.

STEP 6: MYDLINK REGISTRATION

E-mail Address (Account Name):

Password:

b) If you selected “No, I want to register and login with a new mydlink account,” please fulfill the required information in order to create a new mydlink account.
Note: The mydlink password is the password to log in to the mydlink web portal and mydlink mobile apps. This is NOT the same as your router’s Password.

STEP 6: MYDLINK REGISTRATION

Please fulfill the options to complete the registration.
